Public Health Nuisance Complaint Report

2017 Annual

8	71	298 Hopewell Amwell Road	Closed / Completed
Public Health Nuisance		Trash @ Curb for extended period of time.	

10/17/2017 Robert English

Note Site inspection performed. Trash noted at roadside in "bagster." Conversation held with homeowner. She has a mattress to add to bagster & then it will be removed. It was promised the work would be completed within one week. Reinspection scheduled for 10-30-2017, which allows extra time for Waste Management to physically remove the materials.

12/13/2017 Robert English

Note Debris is long since removed. No further action required.

17	2.01	155 Hopewell Princeton Road	Closed / Completed
Public Health Nuisance		Oil found in septic tank during inspection for resale.	

2/23/2017 Robert English

N.J.A.C. 7:26 & 26A At the time of inspection, a large pad behind the garage on the property was noted to be constructed of loose recycled asphalt pavement (RAP). Use of RAP as a final surfacing material, unless bound with asphalt emulsion or paved with hot mix asphalt or Portland cement concrete is prohibited.

Abatement shall consist of removal of the RAP or take steps to bind or cap the materials with hot mix asphalt or Portland cement. Please note a engineering review for impervious lot coverage and location suitability will be required if the unapproved lot is to be kept in place.

16-3(a) - NJAC 7:9A At the time of inspection, an unknown quantity of oil, appearing to be home heating fuel, was noted in and around the septic system pump tank. It is presently unknown if the pump conveyed this substance into the disposal field. NJAC 7:9A-12.1(d) prohibits, "Disposal of materials containing toxic substances into an individual subsurface sewage disposal system is prohibited. Material containing toxic substances include, but are not limited to, waste oil (other than cooking oil), oil-based or acrylic paints, varnishes, photographic solutions, pesticides, insecticides, paint thinners, organic solvents or degreasers and drain-openers.

Abatement shall consist of hiring a Licensed Site Remediation Professional to evaluate the extent of the contamination and abate the same per New Jersey Department of Environmental Protection requirements. This shall include evaluation of the disposal field for contamination and cleanup if required.

16-7.2(a)-14(a) At the time of inspection, the residential structure was unsecured. The basement access is missing, permitting unfettered access by unauthorized individuals and inquisitive youth.

Abatement shall consist of adequately securing the structure to prevent unauthorized access.

3/2/2017 Robert English

Note Shari Bowman, of PNC - residential OREO, confirmed the septic system has been disconnected. This will prevent any future discharge of oil to septic system. It is still unknown if the system is contaminated already.

3/13/2017 Robert English

Note Met with Mr. Kevin Hellsby - (732) 674-5662 - at property to discuss violations and required actions. Confirmed the power to septic pump was disconnected. LSRP to evaluate the septic delivery line & field for oil. Asphalt parking area to be removed. Replacement bilco door to be installed to secure structure.

Actions proposed are acceptable. Will revisit this in thirty (30) days to assess progress.

9/26/2017 Robert English

Note Purchaser & bank settled on a price to complete cleanup of RAP area. Buyer accepts responsibility for finalizing that work. Oil issue is resolved, as is securing the structure.

No further action is required in regard to this matter at this time.

20.05 1 **8 Tyburn Lane**

Public Health Nuisance Poison Ivy

Closed /
Completed

6/23/2017 Robert English

16-7.2(a)-4 At the time of inspection, poison ivy was noted growing within twenty (20) feet of a lot line.

Abatement shall consist of elimination of all poison ivy within twenty feet of any property line.

7/28/2017 Robert English

Note Site inspection conducted. Violations satisfactorily abated. No further action required at this time.

20.05 16 **150 Pennington Hopewell Road**

Public Health Nuisance Poison Ivy Growing Over Fence & Brush @ Rear of Lot.

Closed /
Completed

6/23/2017 Robert English

16-7.2(a)-4 At the time of inspection, poison ivy was noted growing within twenty (20) feet of a lot line.

Abatement shall consist of elimination of all poison ivy within twenty feet of any property line.

16-7.2(a)-10

At the time of inspection, accumulations of solid waste were noted on the property. Accumulations of brush were noted in the rear portion of the property. These piles create harborage for mice, which are part of the Lyme Disease cycle of infection.

Abatement shall consist of removal and proper disposal of all solid wastes on the property.

26 7 **414 Lambertville Hopewell Road**

Public Health Nuisance High Grass @ Vacant Property

Closed /
Completed

7/27/2017 Robert English

16-7.2(a)-6 At the time of inspection, grass and weeds on the property were noted at a height in excess of ten (10) inches.

Abatement shall consist of cutting of all grass and weeds in excess of ten (10) inches and removal of excess clippings. A routine schedule shall be established to assure the grass and weeds do not exceed the maximum permissible height throughout the remainder of the growing season.

8/15/2017 Robert English

16-7.2(a)-6 At the time of inspection, grass and weeds on the property were noted at a height in excess of ten (10) inches.

Abatement shall consist of cutting of all grass and weeds in excess of ten (10) inches and removal of excess clippings. A routine schedule shall be established to assure the grass and weeds do not exceed the maximum permissible height throughout the remainder of the growing season.

16-7.2(a)-14(a) At the time of inspection, the structure(s) on the property were unsecured.

Abatement shall consist of adequately securing the structure to prevent access by unauthorized individuals or inquisitive youth.

10/11/2017 Robert English

Note Complainant reports the lot has been cut! No further action required at this time.

33	1.01	131 Route 31 North	Closed / Completed
Public Health Nuisance		Observed Solid Waste Violations while conducting routine field work. Site has history of similar violations.	

2/28/2017 Robert English

16-7.2(a)-9 Another site inspection conducted. Trash violations persist.

Spoke to staff, who remembered my last visit & again stated trash would be addressed.

3/13/2017 Robert English

16-7.2(a)-9 Site inspection conducted. Solid waste violations persist.

Photos taken & no attempt made to discuss with staff. Notice will be sent to Quick Chek attorney prior to formal legal action is taken.

3/17/2017 Robert English

Note Notice generated separately and sent via regular mail & emailed to Quick Chek attorney.

3/23/2017 Robert English

16-7.2(a)-9 At time of inspection, solid waste was noted around dumpsters and blow onto neighboring lot. This is a routine violation at site.

Spoke to manager about issue, who stated it would be addressed.

33	10	47 Pennington Hopewell Road	Closed / Completed
Public Health Nuisance		High Grass - Suspected to be Unsecured	

3/6/2017 Robert English

Note 2016 Actions are complete. Lien is filed to collect on cuts. No owner has come forward to face charges. Closing case until situation changes.

37	4.03	6 Applewood Drive	Municipal Abatement
Public Health Nuisance		High Grass - Abandoned Home	

8/15/2017 Robert English

16-7.2(a)-12 At the time of inspection, stagnant water was noted that provides harborage and breeding place for mosquitoes.

Abatement shall consist of elimination of stagnant water bodies when possible. Otherwise, treatment shall be implemented to eliminate possibility of mosquitoes breeding. Mercer County Mosquito control can be reached at 609-530-7500 for consultation and short term assistance. This organization is NOT responsible for long term management. Failure to implement a long term management strategy for pools, decorative ponds, and other large water bodies will result in summons to municipal court.

16-7.2(a)-6 At the time of inspection, grass and weeds on the property were noted at a height in excess of ten (10) inches.

Abatement shall consist of cutting of all grass and weeds in excess of ten (10) inches and removal of excess clippings. A routine schedule shall be established to assure the grass and weeds do not exceed the maximum permissible height throughout the remainder of the growing season.

8/31/2017 Robert English

16-7.2(a)-9 At the time of inspection, accumulations of solid waste were noted on the property. There is household trash and construction debris near the garage and driveway.

Abatement shall consist of removal and proper disposal of all solid wastes on the property.

16-7.2(a)-6 At the time of inspection, grass and weeds on the property were noted at a height in excess of ten (10) inches.

Abatement shall consist of cutting of all grass and weeds in excess of ten (10) inches and removal of excess clippings. A routine schedule shall be established to assure the grass and weeds do not exceed the maximum permissible height throughout the remainder of the growing season.

16-7.2(a)-12 At the time of inspection, stagnant water was noted that provides harborage and a breeding place for mosquitos.

Abatement shall consist of treatment or removal of the stagnant water.

9/19/2017 Robert English

Note Compliance inspection conducted to evaluate abatement actions. At time of inspection, the lawn, solid waste & mosquito harborage violations were unabated. No contact has been made to Health Dept. regarding notices (posted or mailed).

Summons and Municipal Abatement Action to follow immediately.

37	4.15	5 Applewood Drive	Municipal Abatement
Public Health Nuisance		High Grass & Trash	

5/26/2017 Robert English

16-7.2(a)-12 At the time of inspection, the in ground swimming pool was uncovered and stagnant. Stagnant water provides harborage and breeding place for mosquitoes.

Abatement shall consist of treatment of the pool to assure the water is not harboring or breeding mosquitoes. It is recommended you reach out to Mercer County Mosquito Control, who will provide guidance and short term assistance with treatment for no cost.

16-7.2(a)-9 At the time of inspection, accumulations of solid waste were noted on the property. Overflow waste bins were noted in the driveway and behind the garage. Additionally, residential trash was spread across the lawn.

Abatement shall consist of removal and proper disposal of all solid wastes on the property.

16-7.2(a)-6 At the time of inspection, grass and weeds on the property were noted at a height in excess of ten (10) inches.

Abatement shall consist of cutting of all grass and weeds in excess of ten (10) inches and removal of excess clippings. A routine schedule shall be established to assure the grass and weeds do not exceed the maximum permissible height throughout the remainder of the growing season.

6/9/2017 Robert English

16-7.2(a)-14(a) At the time of inspection, the structure(s) on the property were unsecured.

Abatement shall consist of adequately securing the structure to prevent access by unauthorized individuals or inquisitive youth.

16-7.2(a)-6 At the time of inspection, grass and weeds on the property were noted at a height in excess of ten (10) inches.

Abatement shall consist of cutting of all grass and weeds in excess of ten (10) inches and removal of excess clippings. A routine schedule shall be established to assure the grass and weeds do not exceed the maximum permissible height throughout the remainder of the growing season.

16-7.2(a)-12 At the time of inspection, stagnant water was noted that provides harborage and breeding place for mosquitoes.

Abatement shall consist of elimination of stagnant water bodies when possible. Otherwise, treatment shall be implemented to eliminate possibility of mosquitoes breeding. Mercer County Mosquito control can be reached at 609-530-7500 for consultation and short term assistance. This organization is NOT responsible for long term management. Failure to implement a long term management strategy for pools, decorative ponds, and other large water bodies will result in summons to municipal court.

6/23/2017 Robert English

Note Final compliance inspection conducted. Portions of front yard partially mowed. Height, even in mowed areas, remains in excess of ten (10) inches. Sides and rear of lot are now >24' tall. Pool remains stagnant with no evidence of corrective actions being initiated. Structure remains unsecured.

6/27/2017 George Kiesel

Note Brief inspection conducted to confirm no corrective actions occurred between 6-23 & 6-27. None were noted. There was a "tenant" present at time of visit, who indicated vandals had damaged home.

Proceeding with summonses and abatement of violations.

No additional photos taken.

Environmental New Jersey Department of Environmental Protection Hotline Report - Concern regarding dumping of unknown liquid into creek that flows through property.

10/19/2017 Robert English

Note Robert English met with Terry Rutkowski, New Jersey Department of Environmental Protection Water Compliance Officer, and searched for possible sources of contamination. Standing water on complainant's property has grey haze and does appear have been contaminated, though with what is unknown. Might be sewage/laundry.

Pockets of water in stream upstream are clean & clear. Upstream septic systems were evaluated and no evidence of malfunctions were noted. No sump pump lines or other pipes into creek were noted.

It would take a large volume to fill creek, which is 90% dry, to a level that would even flow to the location.

Public Health Nuisance	Solid Waste Complaint	
2/13/2017 Robert English		
Note	RE contacted the property owners via email to broach the complaint, which reads as follows: "Can a person even place junk on the other side of a fence facing a neighboring property if not encroaching on neighboring property? Thought I saw that in the ordinance. Also, does the township document that the good side of a fence does not have to face a neighboring property? York fence indicated to me that it's 'illegal'?"	
Of the issues noted, only the potential solid waste aspect involves Health Dept. RE explained what needs to happen to store materials on properties in Twp. without creating nuisance conditions.		
Mr. Jamieson requested inspection be conducted next week, so he could assure there are no problems. RE found this proposal acceptable. Recall set for Tuesday, February 21, 2017 for follow-up. Offices are closed Monday.		
3/1/2017 Robert English		
Note	Site inspection conducted. No solid waste violations were noted. It was further noted the fence is identical on both sides, except the posts are on the inside.	
No further actions required.

2/12/2017 Robert English

Note Complaint reads as follows:

River Watcher <canalwatch14@gmail.com>
Feb 11 (3 days ago)

to clerk, zoningofficial, zoningboard, planningboard, health, lgompf, renglish, koswald, gkiesel, rmiller, marlendooley

To Whom It May Concern:

Today as I passed the Golden Nugget Flea Market I noted what appears to be a large sign announcing a new restaurant on one of the buildings on this property. As the situation at the Golden Nugget is already chaotic, I am concerned about this and wanted to raise the following questions.

1. Traffic from Route 29. Traffic in and out of the Golden Nugget from Route 29 is already hazardous and congested on days that the market is open. Have plans been made to accommodate additional traffic from a new restaurant? Have permits been secured and a plan filed? Is there a traffic study?
2. Traffic Circulation on Lot. Traffic within the Golden Nugget is already hazardous, with no defined markings, circulation patterns, parking spots, accessible paths, or pedestrian paths. Have accommodations been made for this new restaurant?
3. Parking. There is inadequate parking at the Golden Nugget as it is, with cars parked haphazard and illegally on Route 29. Has parking been provided for this new restaurant in the proper ratio, including handicap spaces? Have permits been secured and a plan filed?
4. Bathrooms. The Golden Nugget already lacks proper sanitation, using poorly maintained port-o-potties. Have bathrooms been provided for this new restaurant, including handicapped accessible?
5. Septic. Has adequate septic been provided for the new restaurant, including the necessary grease trap? Have permits been secured and a plan filed?
6. Signage. Is this new banner sign permanent? Has it been reviewed for visual impact on the canal?

In general this site is in desperate need of a cleanup to bring it up to code and any new project should trigger a global review.

Thank you for your attention to these matters. Please forward these matters to the appropriate committees of code officials for follow-up. I hope that the proper department follows up.

2/13/2017 Robert English

Note RE reached out to owner of Golden Nugget property regarding complaint. Email reply indicates the proposed changes are all outside Hopewell.

2/14/2017 Robert English

Note RE spoke with Dan Brenna to discuss complaint and confirm the activities described in complaint are not within the boundaries of Hopewell Twp.

No further action required.

Public Health Nuisance	Vacant, unsecured structure with solid waste on lot.	

3/20/2017 Robert English

16-7.2(a)-14(a) At the time of inspection, it was noted the rear entry door to the residential structure was unsecured.

It was also noted that the front door had been replaced with a new door, which was secured.

Please assure the rear door is also secured to prevent access by unauthorized individuals or inquisitive youth.

16-7.2(a)-9 At the time of inspection, solid waste around the property had not yet been abated. Recognizing there was a significant snow event that impacted the area during the initial compliance period, additional time to address this issue is warranted.

Please assure the construction waste, roof tar buckets, abandoned furniture, old tarps and other debris are collected and properly disposed of.
