## MEMORANDUM

To: Hopewell Township Planning Board

From: Mark Kataryniak, P.E., Community Development Director / Township Engineer *(MK)*

Date: January 11, 2021

RE: **Completeness Review - #1**  
**Hopewell Parc**  
**Applicant: US Home Corporation, D/B/A Lennar**  
P/F Major Subdivision & P/F Site Plan; IPD-1 Zone  
Block 93, Lot 5.01; Scotch Road  
Block 93, Lot 5.02; 449 Scotch Road  
Block 93, Lot 6.02; 445 Scotch Road

---

### **I. Application Submission Items**

- A. An application submission package was received on December 16, 2020 containing:
  1. A letter dated December 16, 2020 from Jason Tuvel, Esq., of Prime and Tuvel, transmitting the subject application and itemizing included materials as further described herein.
  2. Completed Application forms executed by Applicant and by the three owners, in counterpart, of the Property; namely, the Applicant, US Home Corporation, D/B/A Lennar, (Block 93, Lot 5.01), CF Hopewell CC&L, LLC (Block 93, Lot 5.02) and Hopewell West Res, LLC, co-owner with Applicant (Block 93, Lot 6.02);
  3. Application and Escrow Fee Calculation Form and two checks of the Applicant, made payable to the Township of Hopewell, representing Application Fees and Escrow Deposit;
  4. Executed Escrow Agreement with IRS Form W-9 pertaining to Applicant;
  5. Hopewell Township Tax Collector's certification of payment of taxes;
  6. Consent to Entry executed by all owners and by Applicant;
  7. Checklists for Preliminary and Final Site Plan and Preliminary and Final Subdivision, completed and signed by Brian R. Perry, PE, Van Note-Harvey Associates, Inc., Project Engineer;
  8. Checklist Submission and Design Waiver Request Form with Addendum;
  9. Certificate of Ownership / Applicant Disclosure Statement, completed by Applicant;
  10. ALTA / NSPS Land Title Survey, Block 93 Lots 5.01, 5.02 and 6.02 for US Home Corporation D/B/A Lennar, prepared by Kenneth R. Raike, PLS, Van Note-Harvey Associates, Inc., dated May 8, 2019, last revised January 8, 2020, consisting of 1 sheet;
  11. Tree Inventory Plan (Existing Conditions Plan, Site Plan Sheet 1 of 5 through Sheet 5 of 5);

**Completeness Review - # 1**

**Hopewell Parc**

**Applicant: US Home Corporation, D/B/A Lennar**

P/F Major Subdivision & P/F Site Plan; IPD-1 Zone

12. Preliminary and Final Major Subdivision and Preliminary and Final Site Plan Set, consisting of various sheets as indexed on the plan set cover sheet, prepared and signed by Brian R. Perry, PE of Van Note-Harvey Associates, Inc., Princeton, NJ, dated December 16, 2020;
13. Traffic Impact Study for Hopewell Parc, prepared by Karl A. Pehnke, PE, PTOE and Eric J. Viloria, PE of Langan Engineering & Environmental Services, Inc., Lawrenceville, NJ, dated December 16, 2020;
14. Environmental Impact Assessment entitled, "Environmental Impact Report for Hopewell Parc," prepared by Van Note-Harvey Associates, Inc., dated December 16, 2020;
15. Engineer's Report for Hopewell Parc, prepared by Van Note-Harvey Associates, Inc., dated December 16, 2020;
16. Stormwater Management Measures Maintenance Plan and Field Manuals for Hopewell Parc, prepared by Van Note-Harvey Associates, Inc., dated December 16, 2020;
17. Fiscal Impact Report entitled, "Community Impact Statement for a Proposed Residential Development in Hopewell Township, Mercer County, New Jersey," prepared by Richard B. Reading of Richard B. Reading Associates, Princeton, NJ, dated December 14, 2020;
18. Preliminary Subsurface Investigation-Proposed Stormwater Facilities, prepared by Melick-Tully, A Division of GZA, dated November 17, 2020;
19. Copies of the following NJDEP permits:
  - NJDEP Freshwater Wetlands Letter of Interpretation: Line Verification Permit dated April 17, 2020 (File No.: 1106-09-0003.2);
  - NJDEP Flood Hazard Area Verification dated November 7, 2019 (File No.: 1106-09-0003.2 LUP 190001);
20. Architectural Elevations and Floor Plans for Hopewell Parc, prepared by:
  - Holiday Architects, Inc., dated December 1, 2020, Sheets A-1 through A-34;
  - Major Architects, dated December 16, 2020, Sheets A-01 through A-15;

Preliminary and Final Subdivision Plat for Hopewell Parc, prepared by Van Note-Harvey Associates, Inc., dated December 16, 2020, Sheets CE4-A through CE-15.

B. Electronic versions of the originally submitted materials described above were received on December 16, 2020.

**II. Description**

The subject application seeks approval for preliminary and final major subdivision as well as preliminary and final site plan to develop an inclusionary residential development containing a total of 1,077 units, comprised of 861 market-rate and 216 affordable units, and contained within two areas identified as the North and South Sections of Hopewell Parc. Each Section contains a mix of single-family homes, townhomes, stacked townhomes, multi-family buildings and HOA-operated amenities.

**Completeness Review - # 1**

**Hopewell Parc**

**Applicant: US Home Corporation, D/B/A Lennar**

P/F Major Subdivision & P/F Site Plan; IPD-1 Zone

Block 93, Lots 5.01, 5.02, 6.02

January 11, 2021

Page 3 of 12

---

The composition of the proposed development by unit type is as follows:

| <b>Building Type</b>    | <b>North Section</b> |                   | <b>South Section</b> |                   |
|-------------------------|----------------------|-------------------|----------------------|-------------------|
|                         | <b>Market-Rate</b>   | <b>Affordable</b> | <b>Market-Rate</b>   | <b>Affordable</b> |
| Multi-Family Units      | 216                  | 122               | 38                   | 94                |
| Townhouses, Stacked     | 92                   |                   | 224                  |                   |
| Townhouses              | 30                   |                   | 70                   |                   |
| Single-Family, 60' lots | 33                   |                   | 47                   |                   |
| Single-family, 70' lots | 49                   |                   | 62                   |                   |
| Subtotal:               | 420                  | 122               | 441                  | 94                |
| <b>Total Units:</b>     | <b>542</b>           |                   | <b>535</b>           |                   |

**III. Submission Checklist Review**

I have reviewed the application materials and requests for waivers on the various submission checklists related to the application. Copies of the checklists and submission waiver requests submitted by the applicant are attached to this memo. A review of the various checklists is contained in the following along with my recommendations for the various items listed:

**Completeness Review - # 1****Hopewell Parc****Applicant: US Home Corporation, D/B/A Lennar**

P/F Major Subdivision &amp; P/F Site Plan; IPD-1 Zone

Block 93, Lots 5.01, 5.02, 6.02

January 11, 2021

Page 4 of 12

**A. Preliminary Major Subdivision Checklist (dated 12/15/2020)**

1. Items Not Provided: The items noted below were noted on the checklist as submitted (marked “x”) but were not received. I recommend these items be identified as submission waivers and approved as such, with the recommended action/condition indicated for each item listed.

| Item No.              | Description                                | Comment   | Recommendation   |
|-----------------------|--|---|--|
| <b>Administrative</b> |  |   |  |
| 23                    | Utility Co. letters confirming easements   | Confirmation of the adequacy of easements not provided. | Require submission as a Condition of any Board approval.           |
| <b>Engineering</b>    |  |   |  |
| 17                    | Plans/Profiles for widening existing roads | Not provided on plans for Scotch Road improvements.     | Require details be provided for review by the Board professionals. |
| 18                    | Sections for widening existing roads       | Not provided on plans for Scotch Road improvements.     | Require details be provided for review by the Board professionals. |

2. Items Not Applicable: The items noted below were identified on the submitted checklist as either waivers or not applicable (N/A). I concur that these items are not applicable to the subject application. The proposed development will be served by public water and sewer, eliminating the need for the Administrative Items. The items identified on the Engineering and Planning checklists are not applicable. A General Development Plan has not been sought for this project, and the other identified items are not contained within the limits of the subject properties.

| Item No.              | Description   |
|-----------------------|---|
| <b>Administrative</b> |   |
| 16                    | Well Water Supply Evaluation                              |
| 17                    | Existing Septic System Certification                      |
| 18                    | Water Quality Test Reports                                |
| <b>Engineering</b>    |   |
| 23                    | Compliance with General Development Plan                  |
| <b>Planning</b>       |   |
| 4                     | Compliance with General Development Plan                  |
| 6                     | Compliance with Historic Preservation Commission Criteria |
| 7                     | Cultural features, historic sites & critical viewsheds    |

**C. Preliminary Site Plan Checklist (dated 12/15/2020)**

1. **Items Not Provided:** The items noted below were noted on the checklist as submitted (marked “x”) but were not received or the information not complete. I recommend these items be identified as submission waivers and approved as such, with the recommended action/condition indicated for each item listed.

| <b>Item No.</b>       | <b>Description</b>                                   | <b>Comment</b>  | <b>Recommendation</b>  |
|-----------------------|--|---|--|
| <b>Administrative</b> |  |   |  |
| 23                    | Utility Co. confirmation of easements                | Confirmation of the adequacy of easements not provided.   | Require submission as a Condition of any Board approval.   |
| <b>Engineering</b>    |  |   |  |
| 18                    | Half Cross Sections for Existing Roads to be widened | Information not provided for Scotch Road improvements.  | Require details be provided for review by the Board professionals.   |
| 20                    | Compliance with all Design Standards                 | Design waivers requested / identified: <ul style="list-style-type: none"> <li>• 17-90.1-b – Full cut-off requirements for lighting luminaires.</li> </ul> RSIS de minimis exceptions identified: <ul style="list-style-type: none"> <li>• 5:21-4.19(b)2-Intersection location</li> <li>• 5:21-4.19(b)5-Centerline Radius</li> </ul> | Defer to technical review to identify any other design waivers as may be applicable and require testimony by the applicant to justify the exceptions to the identified design standards. |

2. **Items Not Applicable:**

- a. The items noted below were identified on the submitted checklist as not applicable (N/A). I believe these items are applicable to the subject project, and that information be provided. I recommend that a submission waiver be granted for the item listed below for completeness purposes, but that the information be provided to the Board professionals for review of the application.

| <b>Item No.</b> | <b>Description</b>  |
|-----------------|---|
| <b>Health</b>   |   |
| 1               | Location of existing septic systems within 200 feet of the boundary of the site |

- b. The items noted below were identified on the submitted checklist as either waivers or not applicable (N/A). I concur that these items are not applicable to the subject application. The proposed development will be served by public water and sewer, eliminating the need for the Administrative and Health Items identified. The items identified on the Engineering and Planning checklists are not applicable. A General Development Plan has not been sought for this project, and the other identified items are not contained within the limits of the subject properties.

| <b>Item No.</b>       | <b>Description</b>                   |

**D. Final Site Plan Checklist (dated 12/15/2020)**

1. Items Not Provided: The items noted below were noted on the checklist as submitted (marked “x”) but were not received. I recommend these items be identified as submission waivers and approved as such, with the recommended action/condition indicated for each item listed.

| Item No.              | Description                                  | Comment   | Recommendation  |
|-----------------------|--|---|---|
| <b>Administrative</b> |  |   |   |
| 11                    | Resolution of Preliminary Site Plan Approval | Preliminary and Final Subdivision application submitted concurrently. | Defer to technical review and comment by Board professionals. |
| 13                    | Utility Co. confirmation of easements        | Confirmation of the adequacy of easements not provided.               | Require submission as a Condition of any Board approval.      |
| <b>Planning</b>       |  |   |   |
| 7                     | Block/Lot Numbers                            | Not provided.   | Require submission as a Condition of any Board approval.      |

2. Items Not Applicable: The items noted below were identified on the submitted checklist as a waiver or not applicable (N/A). I concur that these items are not applicable to the subject application. The proposed development will be served by public water and sewer, eliminating the need for the Health Items indicated below.

| Item No.      | Description                              |
|---------------|--|
| <b>Health</b> |  |
| 2             | Final Septic Design Criteria and Grading |

3. Items with Waiver Requests: The items noted below were identified by the applicant as submission waivers with explanations provided and/or reasons noted for the granting of the waiver. I concur and recommend these items be approved as submission waivers, with the recommended action/condition as indicated for each item listed.

| Item No.              | Description                                       | Comment   | Recommendation  |

**IV. Completeness**

I recommend that the Board deem the subject application **complete** at this time, subject to the approval of the conditions and recommendations described above for the various waivers.

I further recommend that the Board consider these waiver requests at the January 28, 2011 meeting of the Planning Board.

Topography shall be 5 foot intervals for slopes of 10% or greater, 2 foot intervals for slopes between 3% and 10% and 1 foot intervals for slopes up to and including 3%. Topography within 200 feet from the subdivision boundary shall be shown. All topography shall be based on NGVD 1988 datum Benchmarks shall be established within 500 feet of the subdivision boundary and shown, together with appropriate references.  |
| <input checked="" type="checkbox"/>  | 9. Subdivision plan showing existing topography; all existing and proposed lot lines, lot dimensions, gross and net lot areas; locations of on-site structures with dimensions to proposed lots (if remaining after subdivision); wetland boundaries and areas; stream corridor boundaries and areas; flood hazard boundaries and areas; all easement boundaries and areas; all proposed streets showing name; right-of-way width and cartway widths; common driveway locations; proposed widened roadway widths along frontage of lot; sight triangle easements and boundaries; and a tabulation of zoning requirements showing zone(s) in which lot is located, bulk requirements of zone(s), bulk requirements proposed by application (including conditional or accessing use requirements) and density. All dimensions shown shall be to nearest on foot and all areas shall be shown to nearest 1/10th acre where easement, flood hazard, stream corridor, or wetland areas overlap, only the most encumbering area is required to be shown. |
| <input checked="" type="checkbox"/>  | 10. All existing and proposed utility service lines and laterals on site and along the frontage of the site. This shall include storm drainage, water mains, sanitary mains, sump pump connections, and underground electric and phone service.  |
| <input checked="" type="checkbox"/><br>Partial W   | 11. Drainage and grading plan duplicating all data shown on the site plan (dimensions not required to determine slopes should not be shown). Existing and proposed contours with intervals of one foot where slopes are less than two percent; with intervals of two feet where slopes are between two percent and ten percent; and with intervals of five feet where slopes exceed ten percent; spot elevations at bottom of curb for every point of curvature or tangency, breaks in grade, and handicapped ramps; elevations of drainage inlet grates and manhole rims; storm and sanitary sewer pipe invert elevations; elevations at corners of proposed structures; finished first floor elevations; and elevations at loading ramps. Contours must be based on NGVD 1988 elevations and benchmarks must be shown. Where drainage swales are proposed, the elevation, percent longitudinal slope and typical cross section of the swales shall be shown.   |
| Proposed grading should be designed to provide a balanced cut and fill condition as much as practical. |  |

12. Storm drainage profiles for all diversion swales, waterways, storm sewer pipe and any other conduit shall be provided. These profiles may be shown on a separate sheet entitled "Drainage Profiles", the detention basin plan or construction detail plans. Existing elevations shall be shown at 100-foot intervals. Proposed elevations for appurtenances shall be shown at 100-foot intervals, concrete structure elevations shall be shown at 50-foot intervals; Invert elevations; elevations at grade changes. Proposed slopes shall be written.

13. A Stormwater Management Plan detailing all existing and proposed grades and contours, outlet structure details, conduit outlet protection details, all inverts of low flow channel with proposed longitudinal slope(s), typical cross section trash rack details, emergency spillway cross sections and profiles to point of discharge, construction details and designations of ultimate ownership of the basin.

14. Hydraulic calculations for storm water management showing, at minimum, no increase in runoff from the predevelopment conditions for the water quality 2, 10, and 100 year storm frequency as determined by "Urban Hydrology for Small Watersheds TR-55" Type III rainfall using the following criteria.

- a. Pre-development conditions shall be considered as "good."
- b. Post development conditions shall be considered as "poor" with maximum impervious coverage permitted by ordinance being used in developing post development curve numbers.
- c. Calculations shall include a separate drainage area map for both pre and post development conditions with soils types, soil uses and flow patterns, time of concentration flow paths and flow lengths and slopes are identified. A separate drainage area map for inlets shall also be provided.
- d. Routing of pre and post development flows through each basin using the mass storage equation and "Urban Hydrology for Small Watersheds TR-55."
- e. Emergency spillways shall be provided. The cross sections shall be designed to pass the 100-year post development inflow plus 50%. The invert shall be set at the crest of the 100-year storage elevation in the basin.
- f. All detention basins shall be designed to serve as a sediment basin during and after construction in accordance with the Standards for Soil Erosion and Sediment Control in New Jersey References.
- g. Computations showing Compliance with the Regulations of the D & R Canal Commission and Mercer County Planning Board.

15. Hydraulic calculations for storm water runoff collection systems shall be submitted. Calculations may use the rational method or Soil Conservation Service method pursuant to the Land Use and Development Ordinance.

16. Plan and centerline profile for all proposed roadways showing existing elevations at 50 foot intervals; proposed elevations at 50 foot intervals and at all horizontal and vertical points of curvature, intersection and tangency; roadway stations at 100 foot intervals and all horizontal and vertical points of curvature, intersection and tangency; written vertical slopes, horizontal curve design radii lengths, and central angles, vertical curve lengths; storm and sanitary sewer piping, stormwater inlet locations, inverts, slopes horizontal offset dimensions, grate or rim elevations; curb lines and locations proposed contours; water mains and valves.

17. Plans and centerline profiles shall be provided for widening of all existing roadways detailing of pavement grades, milling areas, drainage construction, and proposed curb locations.

18. <sup>Partial W</sup> Half cross sections, 50 feet on center, shall be provided for all roadways to be widened. Each section shall include the location and NGVD 1988 elevation of all existing and proposed physical centerline; right-of-way centerline; edge of pavements, right-of-way lines, sidewalk centerlines, sidewalk widths. In addition, the existing and proposed contours 25 feet from the proposed right-of-way line shall be shown.

19. Typical construction details shall be provided on drawings designated as "Construction Details." Details to be shown shall include: typical roadway cross section; storm sewer inlets and manholes (each type proposed); storm sewer headwalls, storm sewer trench; storm sewer flared-end section; underdrain; storm sewer step; curb; curb end treatment, depressed curb; sidewalk, handicapped ramp; street signs; warning and regulatory signs; mailbox, sump pump/underdrain to storm sewer connection; any "poured in place" concrete details and reinforcing schedules; and all retaining wall details. The typical details shown in the site improvement standards are preferred.

20. All on-site wetlands shall be field identified by a qualified expert in accordance with NJDEP standards, and surveyed, and located on the plan by the applicant's New Jersey Professional Land Surveyor. A wetlands report identifying all observations and findings of the wetlands expert shall accompany the site plan application. If the lands remaining are 50 acres or larger, and not to be built upon, wetlands will only be required to be identified within 150 feet of the proposed lots or any other on-site or off tract improvements. The applicant shall certify in writing that no construction shall occur upon the remaining lands until all on-site wetlands are identified.

21. A traffic report and analysis including but not limited to existing and background peak hour traffic volumes and distribution patterns; peak hour onsite generated traffic volumes and distribution patterns; existing and proposed traffic composition; analysis of adequacy of proposed on-site circulation patterns including proposed on-site circulation patterns including adequacy of truck and automobile turning radii; analysis of need for number of loading bays; existing and proposed levels of service and volume/capacity ratios; adequacy of proposed sight distances; analysis of need for acceleration/deceleration lanes; analysis of need for roadway striping, signage of reflectorization; need for signalization and a summary recommendation and conclusions for the analysis. The study area shall include the site as proposed by this application; the site as proposed by a master development plan; the existing and proposed roadway frontages of the site, and the nearest intersection of public roadways as measured away from the site in opposite directions. The roadways approaching the site shall be general reviewed for adequacy to support site generated traffic. This report shall be prepared by a New Jersey licensed Professional Engineer qualified to make the analysis as required herein.

22. Compliance with each and every design standard of the Land Use and Development Ordinance.

23. Compliance with approved General Development Plan.

24. Intermittent and perennial streams, lakes, and waterways with drainage areas 50 acres or larger and the 100-year flood hazard line of each.

25. Stream corridor delineation with requisite buffers preserved by easement.

## Planning

- 1. A key map sheet showing the tract in question: north arrow; zoning district limits; tax lot numbers, tax block numbers, tax sheet numbers; owners names as identified on certified list provided by Township for tract in question and all lots within 200 feet of total tract; Municipal Boundaries; Existing or proposed "Master Plan" features or facilities on the site or within 500 feet of total tract; Airport Hazard Areas; signature and seal of licensed professional; names and address of owner applicant and professional preparing the map; owners certification; zoning data for each zone with all proposed data and deficiencies listed, and index of sheets (where applicable). All measurements specified herein shall be measured radially from the boundary and shall include all lots, zones, etc. on opposite sides of roads and within other municipalities.
- 2. Zoning requirements shall be tabulated to show all bulk requirements of the zone(s) in which the site plan is located and the bulk data proposed by the application. This tabulation shall also identify compliance or noncompliance for all existing structures. All lot areas shown shall be identified as gross and net areas in accordance with ordinance definitions. Density shall be shown as defined by the Land Use and Development Ordinance.
- 3. Compliance with each and every design standard of the Land Use and Development Ordinance.
- 4. Compliance with approved General Development Plan.
- 5. Stream corridor delineation with requisite buffers preserved by easement.
- 6. Compliance with Historic Preservation Commission criteria for on-site structures or features and any historic sites or features within 200 feet of site boundary.
- 7. Cultural features, historic sites and critical viewsheds as mapped by the Township.
- 8. Identification and Location of Affordable Housing Units.

## Landscaping and Lighting

- 1. Aerial extent of tree cover for each woodland stand 10,000 sq. ft. or greater in area with a brief description of the typical tree species found within the stand, the average size of the trees measured 4-1/2' above grade, the average height of the woodland stand, and the general health of the woodland stand. This information may be combined with other environmental information and shown on the Environmental Resource Inventory Summary Map as part of the Environmental Assessment, instead. If this is done, provide a note referring to the Environmental Resource Inventory Summary Map on the Landscape and Lighting Plan.
- 2. The surveyed location of each individual tree 6" or > measured 4-1/2' above grade located inside the limit of disturbance and extending 25' outside the limit of disturbance. A tree preservation chart showing the species and health of each individual tree located inside the limit of disturbance and extending 25' outside the limit of disturbance, and whether each tree is proposed to remain, to be removed, or to be transplanted.
- 3. Proposed trees, shrubs, groundcovers, and vegetative plants with key, detailing the following information:
  - a. Proposed plant names, both common and scientific.

| Appl.<br>Use<br>Only                | Twp<br>Use<br>Only  |
|-------------------------------------|---|
| <input checked="" type="checkbox"/> | b. Proposed plant sizes in caliper, height, and/or width at the time of installation.   |
| <input checked="" type="checkbox"/> | c. Type of nursery stock, (i.e. balled and burlapped or container) and size planting.   |
| <input checked="" type="checkbox"/> | d. Proposed plant spacing and any other comments relating to installation.  |
| <input checked="" type="checkbox"/> | e. Planting notes, including a specification that the plants shall conform to the American Standard for Nursery Stock, latest revision. |
| <input checked="" type="checkbox"/> | f. Delineation showing which areas are to be irrigated.   |
| <input checked="" type="checkbox"/> | 4. Landscape maintenance specifications.  |
| <input checked="" type="checkbox"/> | 5. Planting details conforming with current horticultural practices.  |
| <input checked="" type="checkbox"/> | 6. Pedestrian and bicycle circulation systems, including width proposed and materials.  |
| <input checked="" type="checkbox"/> | 7. Outdoor pedestrian spaces with landscape architectural elements detailed.  |
| <input checked="" type="checkbox"/> | 8. Construction details for pedestrian and bicycle circulation systems, outdoor spaces, and site furnishings.                           |

### Health

|          |  |   |
|----------|--|---|
| <u>W</u> | 1. Compliance with any and all conditions of preliminary major subdivision approval and the preliminary major subdivision checklist.   | — |
| <u>W</u> | 2. Final septic system design criteria and grading shown on "Sewage Disposal and Water Supply Plan."   | — |
| <u>W</u> | 3. Proof of submission of Treatment Works or NJPDES permit applications for any wastewater disposal method or system not in compliance with NJAC 7:9A., any system proposing to discharge more than 2,000 gallons per day, or any proposed connection to a public sewer system requiring a Treatment Works permit application. | — |
| <u>X</u> | 4. Provision for temporary water and sewer to sales offices and construction offices.  | — |

### Engineering

|          |  |   |
|----------|--|---|
| <u>W</u> | 1. Compliance with any and all conditions of preliminary major subdivision approval and the preliminary major subdivision checklist. All documents submitted for preliminary major subdivision approval shall be appropriately revised, retitled, dated, and submitted for final major subdivision approval. All documents submitted shall bear the same date.                           | — |
| <u>X</u> | 2. An estimate of all construction quantities for all on site improvements which shall be dedicated to the public or planned to be monitored by a Homeowners Association. This estimate shall include all construction quantities for all site improvements shown on the approved preliminary plan and shall be signed, sealed and dated by a New Jersey Licensed Professional Engineer. | — |
| <u>W</u> | 3. An estimate of all construction quantities for all off-site or off-tract improvements required to be constructed as part of the approved preliminary major subdivision plan. This estimate shall be based on the off-tract improvement plans and shall be signed, sealed, and dated by the prepared New Jersey Licensed Professional Engineer.  | — |
| <u>W</u> | 4. Metes and bounds descriptions for right-of-way dedications, sight triangle easement; drainage; detention; or conservation easements; common driveway easements; cul-de-sac easements and all other easements or rights-of-way which shall be dedicated to the public or planned to be maintained by a Homeowners Association. Descriptions may be by reference to Final Plat.         | — |
| <u>X</u> | 5. Detailed project phasing plan includes proposed construction sequence, routes to and from site construction methods, hours or operation, construction traffic control plans, temporary construction traffic office locations, and any other construction -related plans.  | — |
| <u>X</u> | 6. A final plat of major subdivision complying with the "Map Filing Law" of the State of New Jersey.   | — |

| <u>Appl.<br/>Use<br/>Only</u>       | <u>Twp<br/>Use<br/>Only</u>  |
|-------------------------------------|--|

### Health

| <i>Appl.<br/>Use<br/>Only</i> |   | <i>Twp<br/>Use<br/>Only</i> |
|-------------------------------|---|-----------------------------|
| <u>W</u>                      | 1. Location of all existing sewage disposal systems on-site and within 200 feet of the boundary of the entire tract.  | —                           |
| <u>W</u>                      | 2. Certification by a New Jersey Licensed Professional Engineer regarding adequacy of any and all existing on-site sewage disposal systems pursuant to Chapters 16 and 17. Potential reserve areas for modification of existing systems shall be shown on the plan. Application will be declared incomplete should failing or unsatisfactory conditions be noted, certified, or found to exist. | —                           |
| <u>W</u>                      | 3. Submission of laboratory test report for all existing on-site wells or potable water supplies pursuant to Chapter 16 and 17. Application shall be declared incomplete should failing or unsatisfactory conditions be noted or found to exist (Bacteria, Nitrate, Volatile organics, and other items required by the Health Officer).   | —                           |
| <u>W</u>                      | 4. Soils Tests shall be provided for primary and reserve septic areas pursuant to Chapters 16 and 17. Test results submitted which are invalid because of expiration dates or do not comply with all provisions of Chapters 16 and 17 shall render the application incomplete.  | —                           |

W 5. The Location and results of all complete, incomplete, unacceptable and unwitnessed profile pits, permeability tests, basin floods and percolation tests. All results shall be shown on a separate plan(s) entitled "Sewage Disposal and Water Supply Plan." All result locations shall be dimensioned to all proposed and existing lot lines, watercourses, easements, wetland limits, sewage disposal and water supply systems within 200 feet of the tests. —

W 6. Submission of individual soil test reports by soil log or test number for each test location in numerical ascending order shall be provided. Each report shall be signed and sealed by a New Jersey Licensed Professional Engineer and coordinated with each lot number shown on the plan submitted. —

W 7. Submission of well water supply evaluation pursuant to Chapter 16. —

W 8. The location of all on-site, off-site, and off tract test wells, monitor wells, and existing wells within 500 feet of the test wells are to be shown pursuant to Chapter 16. —

W 9. Written documentation signed by the homeowners, or affidavits executed by the applicant proving permission. All wells within 500 feet of the test well shall be monitored. In the event monitoring is not permitted, the denial by the homeowner shall be submitted. In the event of a denial or no response, an affidavit by the applicant detailing efforts made to obtain permission and/or the reasons for denial shall also accompany the application. —

W 10. Proof of submission of Treatment Works or NJPDES permit applications for any wastewater disposal method or system not in compliance with NJAC 7:9A., any system proposing to discharge more than 2,000 gallons per day, or any proposed connection to a public sewer system requiring a Treatment Works permit application. —

### Engineering

X 1. Designed, drawn, signed and sealed by A.I.A., C.L.A., N.J.P.E., N.J.P.L.S. or N.J.P.P. as appropriate. —

X 2. Blue or Blackline reproduction on standard sized sheets 30" x 42," 24" x 36," 15" x 21," 8½" x 13." —

X 3. Acceptable title block containing minimum data as prescribed by N.J.S.A. 13:40-1. —

X 4. All scales shall be written and graphically identified. Minimum scales for plan preparation shall be as follows:  
X a. Key Maps: 1" - 1000'  
X b. Boundary and Topographic Survey: 1" = 100'  
X c. Environmental Inventory Maps: 1" = 200'  
X d. Grading and Drainage Plans: 1" = 50'  
X e. Site Plans: 1" = 50'  
X f. Plans and Profiles: 1" = 50'-Horizontal; 1" = 5' - Vertical  
Horizontal to Vertical Ratio of scales being no more than 10. —

W g. Sewage Disposal and Water Supply Plan: 1" = 50' —

h. Landscaping: 1" = 50' for street tree planting islands. Individual unit, island, or other detailed landscaping being provided at a minimum of 1" = 30.'

5. A north arrow with reference meridian.

6. A legend identifying symbols and drafting techniques used.

7. A border shall be placed on all plans. This border shall be 1/2" for the bottom, right side and top of each plan with a 1½" border on the left side.

8. A boundary and topographic survey of the total tract signed and sealed by the preparing NJ. Professional Land Surveyor in accordance with N.J.S.A. 13:40. Topography shall be 5 foot intervals for slopes of 10% or greater, 2 foot intervals for slopes between 3% and 10% and 1 foot intervals for slopes up to and including 3%. Topography within 200 feet from the subdivision boundary shall be shown. All topography shall be based on NGVD 1988 datum. Benchmarks shall be established within 500 feet of the subdivision boundary and shown, together with appropriate references.

9. All existing and proposed utility service lines and laterals on site and along the frontage of the site. This shall include storm drainage, water mains, sanitary mains, sump pump connections, and underground electric and phone service.

10. Site Plan showing the proposed use and site improvements including but not limited to: existing topography; location of all proposed structures with dimensions to boundaries; location of all existing structures to remain or to be removed; proposed access aisles with curb-to-curb dimensions for width; curb radii dimensions; automobile parking stalls with dimensions for width and depth; truck loading and parking aisle and stalls with dimensions for stall length and width; type of truck to use loading area; typical truck radii detail; loading dock locations; all sidewalk locations and dimensions; provisions for handicapped; location of bench mark; flood hazard areas; wetlands boundaries; stream corridor areas; easement areas; traffic warning and regulatory signs; and trees to be removed/remain.

11. Drainage and grading plan duplicating all data shown on the site plan (dimensions not required to determine slopes should not be shown). Existing and proposed contours with intervals of one foot where slopes are less than two percent; with intervals of two feet where slopes are between two percent and ten percent; and with intervals of five feet where slopes exceed ten percent; spot elevations at bottom of curb for every point of curvature or tangency, breaks in grade, and handicapped ramps; elevations of drainage inlet grates and manhole rims; storm and sanitary sewer pipe invert elevations; elevations at corners of proposed structures; finished first floor elevations; and elevations at loading ramps. Contours must be based on NGVD 1988 elevations and benchmarks must be shown. Where drainage swales are proposed, the elevation, percent longitudinal slope and typical cross section of the swales shall be shown.

Proposed grading shall be designed to provide a balanced cut and fill condition as much as practical.

12. Storm drainage profiles for all diversion swales, waterways, storm sewer pipe and any other conduit shall be provided. These profiles may be shown on a separate sheet entitled "Drainage Profiles", the detention basin plan or construction detail plans. Existing elevations shall be shown at 100-foot intervals. Proposed elevations for appurtenances shall be shown at 100-foot intervals, concrete structure elevations shall be shown at 50-foot intervals; Invert elevations; elevations at grade changes. Proposed slopes shall be written.

13. A Stormwater Management Plan detailing all existing and proposed grades and contours, outlet structure details, conduit outlet protection details, all inverts of low flow channel with proposed longitudinal slope(s), typical cross section trash rack details, emergency spillway cross sections and profiles to point of discharge, construction details and designations of ultimate ownership of the basin.

14. Hydraulic calculations for stormwater detention showing no increase in runoff from the pre-development conditions for the water quality 2, 10, and 100 year storm frequency as determined by "Urban Hydrology for Small Watersheds TR-55" Type III rainfall using the following criteria.

a. Pre-development conditions shall be considered as "good."

b. Post development conditions shall be considered as "poor" with maximum impervious coverages permitted by ordinance being used in developing post development curve numbers.

c. Calculations shall include a separate drainage area map for both pre- and post-development conditions with soils types, soil uses and flow patterns, time of concentration flow paths and flow lengths and slopes being identified. A separate drainage area map for inlets shall also be provided.

d. Routing of pre- and post-development flows through each basin using the mass storage equation and "Urban Hydrology for Small Watersheds TR-55."

e. Emergency spillways shall be provided. The cross sections shall be designed to pass the 100-year post development inflow plus 50%. The invert shall be set at the crest of the 100-year storage elevation in the basin.

f. All detention basins shall be designed to serve as a sediment basin during and after construction in accordance with the Standards for Soil Erosion and Sediment Control in New Jersey References.

g. Computations showing Compliance with the Regulations of the D & R Canal Commission and the Mercer County Planning Board.

15. Hydraulic calculations for stormwater runoff collection systems shall be submitted. Calculations may use the rational method or Soil Conservation Service method pursuant to the Land Use and Development Ordinance.

16. Typical construction details shall be provided on drawings designated as "Construction Details." Details to be shown shall include: typical roadway cross section; storm sewer inlets and manholes (each type proposed); storm sewer headwalls, storm sewer trench; storm sewer flared-end section; underdrain; storm sewer step; curb; curb end treatment, depressed curb; sidewalk, handicapped ramp; street signs; warning and regulatory signs; mailbox, sump pump/underdrain to storm sewer connection; any "poured in place" concrete details and reinforcing schedules; and all retaining wall details. The typical details shown in the site improvement standards are preferred.

17. All on-site wetlands shall be field identified by a qualified expert in accordance with NJDEP standards, and surveyed, and located on the plan by the applicant's New Jersey Professional Land Surveyor. A wetlands report identifying all observations and findings of the wetlands expert shall accompany the site plan application. If the lands remaining are 50 acres or larger, and not to be built upon, wetlands will only be required to be identified within 150 feet of the proposed lots or any other on-site or off tract improvements. The applicant shall certify in writing that no construction shall occur upon the remaining lands until all on-site wetlands are identified.

18. Partial W Half cross sections, 50 feet on center, shall be provided for all roadways to be widened. Each section shall include the location and NGVD 1988 elevation of all existing and proposed physical centerline; right-of-way centerline; edge of pavements, right-of-way lines, sidewalk centerlines, sidewalk widths. In addition, the existing and proposed contours 25 feet from the proposed right-of-way line shall be shown.

X 19. A traffic report and analysis including but not limited to existing and background peak hour traffic volumes and distribution patterns; peak hour onsite generated traffic volumes and distribution patterns; existing and proposed traffic composition; analysis of adequacy of proposed on-site circulation patterns including adequacy of truck and automobile turning radii; analysis of need for number of loading bays; existing and proposed levels of service and volume/capacity ratios; adequacy of proposed sight distances; analysis of need for acceleration/deceleration lanes; analysis of need for roadway striping, signage or reflectorization; need for signalization and a summary recommendation and conclusions for the analysis. The study area shall include the site as proposed by this application; the site as proposed by a master development plan; the existing and proposed roadway frontages of the site, and the nearest intersection of public roadways as measured away from the site in opposite directions. The roadways approaching the site shall be generally reviewed for adequacy to support site generated traffic. This report shall be prepared by a New Jersey licensed Professional Engineer qualified to make the analysis as required herein.       

X 20. Compliance with each and every design standard of the Land Use and Development Ordinance.       

W 21. Compliance with approved General Development Plan.       

X 22. Intermittent and perennial streams, lakes, and waterways with drainage areas 50 acres or larger and the 100-year flood hazard line of each.       

X 23. Stream corridor delineation with requisite buffers preserved by easement.       

### Planning

X 1. A key map sheet showing the tract in question: north arrow; zoning district limits; tax lot numbers, tax block numbers, tax sheet numbers; owners names as identified on certified list provided by Township for tract in question and all lots within 200 feet of total tract; Municipal Boundaries; Existing or proposed "Master Plan" features or facilities on the site or within 500 feet of total tract; Airport Hazard Areas; signature and seal of licensed professional; names and address of owner applicant and professional preparing the map; owners certification; zoning data for each zone with all proposed data and deficiencies listed, and index of sheets (where applicable). All measurements specified herein shall be measured radially from the boundary and shall include all lots, zones, etc. on opposite sides of roads and within other municipalities.       

X 2. Site Plan showing the proposed use and site improvements including but not limited to: existing topography; location of all proposed structures with dimensions to boundaries; location of all existing structures to remain or to be removed; proposed access aisles with curb-to-curb dimensions for width; curb radii dimensions; automobile parking stalls with dimensions for width and depth; truck loading and parking aisle and stalls with dimensions for stall length and width; type of truck to use loading area; typical truck radii detail; loading dock locations; all sidewalk locations and dimensions; provisions for handicapped; location of bench mark; flood hazard areas; wetlands boundaries; stream corridor areas; easement areas; traffic warning and regulatory signs; and trees to be removed/remain.       

X 3. Zoning requirements shall be tabulated to show all bulk requirements of the zone or zones in which the site plan is located and the bulk data proposed by the application. This tabulation shall also identify compliance or noncompliance for all existing structures. All lot areas shown shall be identified as gross and net areas in accordance with ordinance definitions. Density shall be shown as defined by the Land Use and Development Ordinance.

### Landscape and Lighting

- 1. Aerial extent of tree cover for woodland stand 10,000 sq. ft. or greater in area with a brief description of the typical tree species found within the stand, the average size of the trees measured 4-1/2' above grade, the average height of the woodland stand, and the general health of the woodland stand. This information may be combined with other environmental information and shown on the Environmental Resource Inventory Summary Map as part of the Environmental Assessment, instead. If this is done, provide a note referring to the Environmental Resource Inventory Summary Map on the Landscape and Lighting Plan. \_\_\_\_\_
- 2. The surveyed location of each individual tree 6" or > measured 4-1/2' above grade located inside the Limit of disturbance and extending 25' outside the limit of disturbance. A tree preservation chart showing the species and health of each individual tree located inside the limit of disturbance and extending 25' outside the limit of disturbance, and whether each tree is proposed to remain, to be removed, or to be transplanted. \_\_\_\_\_
- 3. Proposed trees, shrubs, groundcovers, and vegetative plants with key, detailing the following information:
  - a. Proposed plant names, both common and scientific. \_\_\_\_\_
  - b. Proposed plant sizes in caliper, height, and/or width at the time of installation. \_\_\_\_\_
  - c. Type of nursery stock, (i.e. balled and burlapped or container) and size planting. \_\_\_\_\_
  - d. Proposed plant spacing and any other comments relating to installation. \_\_\_\_\_
  - e. Planting notes, including a specification that the plants shall conform to the American Standard for Nursery Stock, latest revision. \_\_\_\_\_
  - f. Delineation showing which areas are to be irrigated. \_\_\_\_\_
- 4. Landscape maintenance specifications. \_\_\_\_\_
- 5. Planting details conforming with current horticultural practices. \_\_\_\_\_
- 6. Pedestrian and bicycle circulation systems, including width proposed and materials. \_\_\_\_\_
- 7. Outdoor pedestrian spaces with landscape architectural elements detailed. \_\_\_\_\_

### Health

- w 1. Compliance with any and all conditions of preliminary site plan approval and the preliminary site plan checklist.
- w 2. Final septic system design criteria and grading shown on "Sewage Disposal and Water Supply Plan."
- w 3. Proof of submission of Treatment Works or NJPDES permit applications for any wastewater disposal method or system not in compliance with NJAC 7:9A., any system proposing to discharge more than 2,000 gallons per day, or any proposed connection to a public sewer system requiring a Treatment Works permit application.

### Engineering

- w 1. Compliance with any and all conditions of preliminary site plan approval and the preliminary site plan checklist. All documents submitted for preliminary site plan approval shall be appropriately revised, retitled, dated, and all documents submitted shall bear the same date.
- x 2. Architectural elevations - front, left side, right side, and rear signed and sealed by a New Jersey Licensed Architect. All plans to bear a common date of issue with final site plan.
- w 3. An estimate of all construction quantities for all on-site and off-tract improvements to public property or improvements which shall be dedicated to the public or planned to be maintained by a Homeowners Association.
- w 4. Metes and bounds descriptions for all right-of-way dedications, sight triangle easement; drainage; detention; or conservation easements; and common driveway easements.
- x 5. Detailed project phasing plan including proposed construction sequences, routes to and from site, construction methods, hours of operations, construction traffic control plans, temporary construction office locations, and any other construction-related plans.
- x 6. A Developer's Agreement approved and executed by the Hopewell Township Committee when improvements to public property or improvements which shall be dedicated to the public or a Homeowners Association are part of the approval.

### Planning

- w 1. Compliance with any and all conditions of preliminary site plan approval and the preliminary site plan checklist. All documents submitted for preliminary site plan approval shall be appropriately revised, retitled, dated, and all documents submitted shall bear the same date.
- x 2. Architectural elevations - front, left side, right side, and rear signed and sealed by a New Jersey Licensed Architect. All plans to bear a common date of issue with final site plan.
- x 3. Detailed project phasing plan including proposed construction sequences, routes to and from site, construction methods, hours of operations, construction traffic control plans, temporary construction office locations, and any other construction-related plans.
- x 4. A Developer's Agreement approved and executed by the Hopewell Township Committee when improvements to public property or improvements which shall be dedicated to the public or a Homeowners Association are part of the approval.
- x 5. Detailed site plan showing location of proposed construction trailers and sales facilities; design of parking, access, grading drainage, soil erosion and sediment control, landscaping and lighting at a scale of not smaller than 1" = 50' each facility location.
- x 6. All project identification sign sizes, mounting details, lighting, and lettering type and sizes.
- x 7. Block and Lot numbers approved by Tax Assessor.
- w 8. Copies of all Federal, State, County and local permits obtained as part of preliminary approval.

This form is an integral part of any development checklist submitted to the Township of Hopewell wherein waivers from design standards or submission waivers from application checklist items are requested. This form must be completed for all requested waivers and submitted with the application in order for the application to be considered complete. It is the applicant's responsibility to complete this form in order for proper consideration to be given to the request. Adequate documentation and support data shall be provided with the request in order for the Township to determine the appropriateness of the request. Where technical references or support data are given, the request form shall be signed and sealed by the appropriate professional. Attach additional sheets as necessary.

## **ADDENDUM to Administrative Checklist Item 8**

### **CHECKLIST SUBMISSION AND DESIGN WAIVER REQUEST FORM –**

#### **I. Design Exceptions**

##### **A. Lighting**

###### Ordinance Section 17-90.1 – b.

Full cut-off requirement listed in 17-90.1 – b. requires 0% uplight. Selected luminaire emits ~5% of its total lumen output upward. The luminaire is under 50W and contains a refractive lens, both of which are encouraged by the ordinance for street lighting.

##### **B. RSIS De Minimus Exceptions**

Ordinance 5:21-4.19(b)2: Intersection Location: Opposite Existing or Offset More than 150 ft., required, 97 ft. provided. A De minimus exception is requested for the special condition of rear garages in all townhomes that are accessed via private rear alleys, primarily accessed by residents whose units the alleys serve.

Ordinance 5:21-4.19(b)5: Minimum Centerline Radius (Feet) Neighborhood – 100/Alley -100, required, Neighborhood-100/Alley- 50 provided. A De minimus Exception is requested for the special condition of special purpose private alleys serving rear loaded garages of all townhomes. The private alleys will experience lesser traffic volumes and speeds since they will be accessed only by the residents of the units those alleys serve.

#### **II. Submission Waivers**

##### **A. Preliminary Major Site Plan Checklist**

###### **Administrative**

10. Tree Survey, Preservation and Replacement: Applicant seeks a Submission Waiver from Ord. 12-4.9 “Tree Replacement Plan” to defer submission of its Tree Replacement Plan pending receipt of a) the Delaware and Raritan Canal Commission (DRCC) stream corridor mitigation planting requirements, and b) the NJDEP Riparian Zone and Wetland Buffer planting requirements. Pending receipt of such planting requirements, Applicant has provided existing tree conditions based on 100 ft by 100 ft representative tree plots (see, Existing Conditions Plans, Sheets 1 through 5 of 5).

# 16, 17, 18 and Health Items #1-10: Well and Septic: No wells or septic systems are proposed.

###### **Engineering**

8. and 18.: NGVD: A partial waiver is request in that a conversion has been supplied from NGVD 1929 to 1988.

21. General Development Plan: No General Development Plan is proposed.

### **Planning**

7. and 10: No Historic Preservation Criteria or cultural features are present on the site or within 200ft of the boundary.

### **Landscaping and Lighting**

2. Tree Survey, Preservation and Replacement: Applicant seeks a Submission Waiver from Ord. 12-4.9 "Tree Replacement Plan" to defer submission of its Tree Replacement Plan pending receipt of a) the Delaware and Raritan Canal Commission (DRCC) stream corridor mitigation planting requirements, and b) the NJDEP Riparian Zone and Wetland Buffer planting requirements. Pending receipt of such planting requirements, Applicant has provided existing tree conditions based on 100 ft by 100 ft representative tree plots (see, Existing Conditions Plans, Sheets 1 through 5 of 5.

### **B. Final Major Site Plan Checklist**

#### **Administrative**

12. Application seeks Combined Preliminary and Final Site Plan Approval. Request Conditions pertaining to Preliminary Approval be deferred to and incorporated into Final Approval.

14. Applicant requests that "will serve" documentation be made a condition of approval.

#### **Health**

1. Compliance with Conditions of Preliminary Approval: Application seeks Combined Preliminary and Final Site Plan Approval. Request Conditions pertaining to Preliminary Approval be deferred to and incorporated into Final Approval.

2. Final Septic Design: No septic proposed.

3. NJPDES Application: Not yet submitted, requires endorsement by Township.

#### **Engineering:**

1. Compliance with Conditions of Preliminary Approval: Application seeks Combined Preliminary and Final Site Plan Approval. Request Conditions pertaining to Preliminary Approval be deferred to and incorporated into Final Approval.

3. Estimate of Construction Quantities: item is requested to be deferred as a condition of Final approval

4. Metes and Bonds descriptions of Easements: Waiver requested as all easement will be recorded on the Filed Map.

9. Lot and Block Numbers: To be provided as conditions of Final Approval.

10. Copies of Federal State and Local approvals required as condition of Preliminary Approval: Request these be provided concurrent with Preliminary and Final Approval.

## **Planning**

1. Compliance with Conditions of Preliminary Approval: Application seeks Combined Preliminary and Final Site Plan Approval. Request Conditions pertaining to Preliminary Approval be deferred to and incorporated into Final Approval.
8. Copies of Federal State and Local approvals required as condition of Preliminary Approval: Request these be provided concurrent with Preliminary and Final Approval.

### **C. Preliminary Major Subdivision Checklist**

#### **Administrative**

10. Tree Survey Preservation and Replacement Plan: Applicant seeks a Submission Waiver from Ord. 12-4.9 "Tree Replacement Plan" to defer submission of its Tree Replacement Plan pending receipt of a) the Delaware and Raritan Canal Commission (DRCC) stream corridor mitigation planting requirements, and b) the NJDEP Riparian Zone and Wetland Buffer planting requirements. Pending receipt of such planting requirements, Applicant has provided existing tree conditions based on 100 ft by 100 ft representative tree plots (see, Existing Conditions Plans, Sheets 1 through 5 of 5).

- 16., 17., 18. Well and Septic: No wells or septic systems are proposed.

#### **Engineering**

- 8., 11., and 18.: Partial Waiver: A partial waiver is request in that a conversion has been supplied from NGVD 1929 to 1988.

23. General Development Plan: No General Development Plan is proposed.

## **Planning**

4. General Development Plan: No General Development Plan is proposed.
6. & 7.: No Historic Preservation Criteria or cultural features are present on the site or within 200ft of the boundary.

## **Landscaping & Lighting**

2. Tree Survey Preservation and Replacement Plan: Applicant seeks a Submission Waiver from Ord. 12-4.9 "Tree Replacement Plan" to defer submission of its Tree Replacement Plan pending receipt of a) the Delaware and Raritan Canal Commission (DRCC) stream corridor mitigation planting requirements, and b) the NJDEP Riparian Zone and Wetland Buffer planting requirements. Pending receipt of such planting requirements, Applicant has provided existing tree conditions based on 100 ft by 100 ft representative tree plots (see, Existing Conditions Plans, Sheets 1 through 5 of 5).

#### **D. Final Major Subdivision Checklist**

##### **Administrative**

11. and 12. Signed Preliminary Plans/ Compliance with Conditions of Preliminary Approval: Compliance with Conditions of Preliminary Approval: Application seeks Combined Preliminary and Final Site Plan Approval. Request Conditions pertaining to Preliminary Approval be deferred to and incorporated into Final Approval.

13. Postal addresses: Street names to be supplied and coordinated with Postmaster

##### **Health**

1.Compliance with Conditions of Preliminary Approval: Application seeks Combined Preliminary and Final Site Plan Approval. Request Conditions pertaining to Preliminary Approval be deferred to and incorporated into Final Approval.

2. Final Septic: No wells or septic systems are proposed.

3.NJPDES Application: Not yet submitted, requires endorsement by Township.

##### **Engineering**

1. Compliance with Conditions of Preliminary Approval: Compliance with Conditions of Preliminary Approval: Application seeks Combined Preliminary and Final Site Plan Approval. Request Conditions pertaining to Preliminary Approval be deferred to and incorporated into Final Approval.

3. Estimates of Construction Quantities: Item is requested to be deferred as a condition or Final approval

4. Waiver requested as all easement will be recorded on the Filed Map.

10. Lot and Block Numbers: To be provided as conditions of Final Approval.

11. Copies of Federal State and Local approvals required as condition of Preliminary Approval: Request these be provided concurrent with Preliminary and Final Approval.

##### **Planning**

1.Compliance with Conditions of Preliminary Approval: Application seeks Combined Preliminary and Final Site Plan Approval. Request Conditions pertaining to Preliminary Approval be deferred to and incorporated into Final Approval.

5. Lot and Block Numbers: To be provided as conditions of Final Approval.

6. Copies of Federal State and Local approvals required as condition of Preliminary Approval: Request these be provided concurrent with Preliminary and Final Approval.

**Application Type (check all that apply):**

Appeal of decision of Zoning Officer (Zoning Board only)  
Concept Review with Board (Planning Board only)  
Conditional Use Permit (Planning Board only)  
Extension of time (specify)  
Final Major Subdivision (total lots = 385)  
Final Site Plan ( \_\_\_\_\_ SF of proposed improvements & number of dwelling units 1077)  
General Development Plan (Planning Board only)  
Minor Subdivision (total lots = \_\_\_\_\_)  
Plan resubmittal due to incompleteness determination  
Preliminary Major Subdivision – 10 or fewer lots (total lots = \_\_\_\_\_)  
Preliminary Major Subdivision – more than 10 lots (total lots = 385)  
Preliminary Site Plan – >10ac. and/or >10 dwelling units ( \_\_\_\_\_ SF of proposed improvements & number of dwelling units 1077)  
Preliminary Site Plan – 10 ac. or less and 10 du or less ( \_\_\_\_\_ SF of proposed improvements & number of dwelling units \_\_\_\_\_)  
Request for Interpretation of Zoning Ordinance (Zoning Board only)  
Site Plan Amendment  
Site Plan Waiver  
Technical Review with Professionals  
Variance – bulk or “c”  
Variance – use or other “d” (specify which) (Zoning Board only) \_\_\_\_\_  
Other (specify) \_\_\_\_\_

Provide a description of the project, or reason for appeal. Attach additional sheets as needed:

This Application is an inclusionary residential development with 1077 units consisting of 861 market rate and 216 affordable units. The development is consistent with the Township's Affordable Housing Plan, and the Redevelopment Agreements for the site. The community includes two sections identified as Hopewell Parc, North and South, which will be constructed in multiple phases. Each section contains a mix of single family homes, townhomes, stacked townhomes and multifamily buildings. HOA operated amenities, that collectively include tot lots, dog parks, clubhouses, event center, volleyball court, swimming pools, and community garden, are provided. (See Addendum for distribution detail of units.)

Provide a description of any requested variances. Attach additional sheets as needed:

| Ordinance Section Citation | Description of variance requested and reason / justification for the request. |

Application Type (check all that apply):

Appeal of decision of Zoning Officer (Zoning Board only)  
Concept Review with Board (Planning Board only)  
Conditional Use Permit (Planning Board only)  
Extension of time (specify)  
Final Major Subdivision (total lots = 385)  
Final Site Plan ( \_\_\_\_\_ SF of proposed improvements & number of dwelling units 1077)  
General Development Plan (Planning Board only)  
Minor Subdivision (total lots = \_\_\_\_\_)  
Plan resubmittal due to incompleteness determination  
Preliminary Major Subdivision – 10 or fewer lots (total lots = \_\_\_\_\_)  
Preliminary Major Subdivision – more than 10 lots (total lots = 385)  
Preliminary Site Plan – >10ac. and/or >10 dwelling units ( \_\_\_\_\_ SF of proposed improvements & number of dwelling units 1077)  
Preliminary Site Plan – 10 ac. or less and 10 du or less ( \_\_\_\_\_ SF of proposed improvements & number of dwelling units \_\_\_\_\_)  
Request for Interpretation of Zoning Ordinance (Zoning Board only)  
Site Plan Amendment  
Site Plan Waiver  
Technical Review with Professionals  
Variance – bulk or “c”  
Variance – use or other “d” (specify which) (Zoning Board only)  
Other (specify) \_\_\_\_\_

Provide a description of the project, or reason for appeal. Attach additional sheets as needed:

This Application is an inclusionary residential development with 1077 units consisting of 861 market rate and 216 affordable units. The development is consistent with the Township's Affordable Housing Plan, and the Redevelopment Agreements for the site. The community includes two sections identified as Hopewell Park, North and South, which will be constructed in multiple phases. Each section contains a mix of single family homes, townhomes, stacked townhomes and multifamily buildings. HOA operated amenities, that collectively include tot lots, dog parks, clubhouses, event center, volleyball court, swimming pools, and community garden, are provided. (See Addendum for distribution detail of units.)

Provide a description of any requested variances. Attach additional sheets as needed:

| Ordinance Section Citation | Description of variance requested and reason / justification for the request. |
|----------------------------|---|
|                            | Not Applicable  |

| <input checked="" type="checkbox"/>  | g. Sewage Disposal and Water Supply Plan: 1" = 50'   |
| <input checked="" type="checkbox"/>  | h. Landscaping: 1" = 50' for street tree planting islands. Individual unit, island, or other detailed landscaping being provided at a minimum of 1" = 30'  |
| <input checked="" type="checkbox"/>  | 5. A north arrow with reference meridian.  |
| <input checked="" type="checkbox"/>  | 6. A legend identifying symbols and drafting techniques used.  |
| <input checked="" type="checkbox"/>  | 7. A border shall be placed on all plans. This border shall be 1/2" for the bottom, right side and top of each plan with a 1 1/2" border on the left side.   |
| <input checked="" type="checkbox"/> Partial W  | 8. A boundary and topographic survey of the total tract signed and sealed by the preparing NJ. Professional Land Surveyor in accordance with N.J.S.A. 13:40. Topography shall be 5 foot intervals for slopes of 10% or greater, 2 foot intervals for slopes between 3% and 10% and 1 foot intervals for slopes up to and including 3%. Topography within 200 feet from the subdivision boundary shall be shown. All topography shall be based on NGVD 1988 datum Benchmarks shall be established within 500 feet of the subdivision boundary and shown, together with appropriate references.  |
| <input checked="" type="checkbox"/>  | 9. Subdivision plan showing existing topography; all existing and proposed lot lines, lot dimensions, gross and net lot areas; locations of on-site structures with dimensions to proposed lots (if remaining after subdivision); wetland boundaries and areas; stream corridor boundaries and areas; flood hazard boundaries and areas; all easement boundaries and areas; all proposed streets showing name; right-of-way width and cartway widths; common driveway locations; proposed widened roadway widths along frontage of lot; sight triangle easements and boundaries; and a tabulation of zoning requirements showing zone(s) in which lot is located, bulk requirements of zone(s), bulk requirements proposed by application (including conditional or accessing use requirements) and density. All dimensions shown shall be to nearest on foot and all areas shall be shown to nearest 1/10th acre where easement, flood hazard, stream corridor, or wetland areas overlap, only the most encumbering area is required to be shown. |
| <input checked="" type="checkbox"/>  | 10. All existing and proposed utility service lines and laterals on site and along the frontage of the site. This shall include storm drainage, water mains, sanitary mains, sump pump connections, and underground electric and phone service.  |
| <input checked="" type="checkbox"/> Partial W  | 11. Drainage and grading plan duplicating all data shown on the site plan (dimensions not required to determine slopes should not be shown). Existing and proposed contours with intervals of one foot where slopes are less than two percent; with intervals of two feet where slopes are between two percent and ten percent; and with intervals of five feet where slopes exceed ten percent; spot elevations at bottom of curb for every point of curvature or tangency, breaks in grade, and handicapped ramps; elevations of drainage inlet grates and manhole rims; storm and sanitary sewer pipe invert elevations; elevations at corners of proposed structures; finished first floor elevations; and elevations at loading ramps. Contours must be based on NGVD 1988 elevations and benchmarks must be shown. Where drainage swales are proposed, the elevation, percent longitudinal slope and typical cross section of the swales shall be shown.   |
| Proposed grading should be designed to provide a balanced cut and fill condition as much as practical. |  |

12. Storm drainage profiles for all diversion swales, waterways, storm sewer pipe and any other conduit shall be provided. These profiles may be shown on a separate sheet entitled "Drainage Profiles", the detention basin plan or construction detail plans. Existing elevations shall be shown at 100-foot intervals. Proposed elevations for appurtenances shall be shown at 100-foot intervals, concrete structure elevations shall be shown at 50-foot intervals; Invert elevations; elevations at grade changes. Proposed slopes shall be written.

13. A Stormwater Management Plan detailing all existing and proposed grades and contours, outlet structure details, conduit outlet protection details, all inverts of low flow channel with proposed longitudinal slope(s), typical cross section trash rack details, emergency spillway cross sections and profiles to point of discharge, construction details and designations of ultimate ownership of the basin.

14. Hydraulic calculations for storm water management showing, at minimum, no increase in runoff from the predevelopment conditions for the water quality 2, 10, and 100 year storm frequency as determined by "Urban Hydrology for Small Watersheds TR-55" Type III rainfall using the following criteria.

- a. Pre-development conditions shall be considered as "good."
- b. Post development conditions shall be considered as "poor" with maximum impervious coverage permitted by ordinance being used in developing post development curve numbers.
- c. Calculations shall include a separate drainage area map for both pre and post development conditions with soils types, soil uses and flow patterns, time of concentration flow paths and flow lengths and slopes are identified. A separate drainage area map for inlets shall also be provided.
- d. Routing of pre and post development flows through each basin using the mass storage equation and "Urban Hydrology for Small Watersheds TR-55."
- e. Emergency spillways shall be provided. The cross sections shall be designed to pass the 100-year post development inflow plus 50%. The invert shall be set at the crest of the 100-year storage elevation in the basin.
- f. All detention basins shall be designed to serve as a sediment basin during and after construction in accordance with the Standards for Soil Erosion and Sediment Control in New Jersey References.
- g. Computations showing Compliance with the Regulations of the D & R Canal Commission and Mercer County Planning Board.

15. Hydraulic calculations for storm water runoff collection systems shall be submitted. Calculations may use the rational method or Soil Conservation Service method pursuant to the Land Use and Development Ordinance.

16. Plan and centerline profile for all proposed roadways showing existing elevations at 50 foot intervals; proposed elevations at 50 foot intervals and at all horizontal and vertical points of curvature, intersection and tangency; roadway stations at 100 foot intervals and all horizontal and vertical points of curvature, intersection and tangency; written vertical slopes, horizontal curve design radii lengths, and central angles, vertical curve lengths; storm and sanitary sewer piping, stormwater inlet locations, inverts, slopes horizontal offset dimensions, grate or rim elevations; curb lines and locations proposed contours; water mains and valves.

17. Plans and centerline profiles shall be provided for widening of all existing roadways detailing of pavement grades, milling areas, drainage construction, and proposed curb locations.

18. <sup>Partial W</sup> Half cross sections, 50 feet on center, shall be provided for all roadways to be widened. Each section shall include the location and NGVD 1988 elevation of all existing and proposed physical centerline; right-of-way centerline; edge of pavements, right-of-way lines, sidewalk centerlines, sidewalk widths. In addition, the existing and proposed contours 25 feet from the proposed right-of-way line shall be shown.

19. Typical construction details shall be provided on drawings designated as "Construction Details." Details to be shown shall include: typical roadway cross section; storm sewer inlets and manholes (each type proposed); storm sewer headwalls, storm sewer trench; storm sewer flared-end section; underdrain; storm sewer step; curb; curb end treatment, depressed curb; sidewalk, handicapped ramp; street signs; warning and regulatory signs; mailbox, sump pump/underdrain to storm sewer connection; any "poured in place" concrete details and reinforcing schedules; and all retaining wall details. The typical details shown in the site improvement standards are preferred.

20. All on-site wetlands shall be field identified by a qualified expert in accordance with NJDEP standards, and surveyed, and located on the plan by the applicant's New Jersey Professional Land Surveyor. A wetlands report identifying all observations and findings of the wetlands expert shall accompany the site plan application. If the lands remaining are 50 acres or larger, and not to be built upon, wetlands will only be required to be identified within 150 feet of the proposed lots or any other on-site or off tract improvements. The applicant shall certify in writing that no construction shall occur upon the remaining lands until all on-site wetlands are identified.

21. A traffic report and analysis including but not limited to existing and background peak hour traffic volumes and distribution patterns; peak hour onsite generated traffic volumes and distribution patterns; existing and proposed traffic composition; analysis of adequacy of proposed on-site circulation patterns including proposed on-site circulation patterns including adequacy of truck and automobile turning radii; analysis of need for number of loading bays; existing and proposed levels of service and volume/capacity ratios; adequacy of proposed sight distances; analysis of need for acceleration/deceleration lanes; analysis of need for roadway striping, signage of reflectorization; need for signalization and a summary recommendation and conclusions for the analysis. The study area shall include the site as proposed by this application; the site as proposed by a master development plan; the existing and proposed roadway frontages of the site, and the nearest intersection of public roadways as measured away from the site in opposite directions. The roadways approaching the site shall be general reviewed for adequacy to support site generated traffic. This report shall be prepared by a New Jersey licensed Professional Engineer qualified to make the analysis as required herein.

22. Compliance with each and every design standard of the Land Use and Development Ordinance.

23. Compliance with approved General Development Plan.

24. Intermittent and perennial streams, lakes, and waterways with drainage areas 50 acres or larger and the 100-year flood hazard line of each.

25. Stream corridor delineation with requisite buffers preserved by easement.

## Planning

- 1. A key map sheet showing the tract in question: north arrow; zoning district limits; tax lot numbers, tax block numbers, tax sheet numbers; owners names as identified on certified list provided by Township for tract in question and all lots within 200 feet of total tract; Municipal Boundaries; Existing or proposed "Master Plan" features or facilities on the site or within 500 feet of total tract; Airport Hazard Areas; signature and seal of licensed professional; names and address of owner applicant and professional preparing the map; owners certification; zoning data for each zone with all proposed data and deficiencies listed, and index of sheets (where applicable). All measurements specified herein shall be measured radially from the boundary and shall include all lots, zones, etc. on opposite sides of roads and within other municipalities.
- 2. Zoning requirements shall be tabulated to show all bulk requirements of the zone(s) in which the site plan is located and the bulk data proposed by the application. This tabulation shall also identify compliance or noncompliance for all existing structures. All lot areas shown shall be identified as gross and net areas in accordance with ordinance definitions. Density shall be shown as defined by the Land Use and Development Ordinance.
- 3. Compliance with each and every design standard of the Land Use and Development Ordinance.
- 4. Compliance with approved General Development Plan.
- 5. Stream corridor delineation with requisite buffers preserved by easement.
- 6. Compliance with Historic Preservation Commission criteria for on-site structures or features and any historic sites or features within 200 feet of site boundary.
- 7. Cultural features, historic sites and critical viewsheds as mapped by the Township.
- 8. Identification and Location of Affordable Housing Units.

## Landscaping and Lighting

- 1. Aerial extent of tree cover for each woodland stand 10,000 sq. ft. or greater in area with a brief description of the typical tree species found within the stand, the average size of the trees measured 4-1/2' above grade, the average height of the woodland stand, and the general health of the woodland stand. This information may be combined with other environmental information and shown on the Environmental Resource Inventory Summary Map as part of the Environmental Assessment, instead. If this is done, provide a note referring to the Environmental Resource Inventory Summary Map on the Landscape and Lighting Plan.
- 2. The surveyed location of each individual tree 6" or > measured 4-1/2' above grade located inside the limit of disturbance and extending 25' outside the limit of disturbance. A tree preservation chart showing the species and health of each individual tree located inside the limit of disturbance and extending 25' outside the limit of disturbance, and whether each tree is proposed to remain, to be removed, or to be transplanted.
- 3. Proposed trees, shrubs, groundcovers, and vegetative plants with key, detailing the following information:
  - a. Proposed plant names, both common and scientific.

| Appl.<br>Use<br>Only                | Twp<br>Use<br>Only  |
|-------------------------------------|---|
| <input checked="" type="checkbox"/> | b. Proposed plant sizes in caliper, height, and/or width at the time of installation.   |
| <input checked="" type="checkbox"/> | c. Type of nursery stock, (i.e. balled and burlapped or container) and size planting.   |
| <input checked="" type="checkbox"/> | d. Proposed plant spacing and any other comments relating to installation.  |
| <input checked="" type="checkbox"/> | e. Planting notes, including a specification that the plants shall conform to the American Standard for Nursery Stock, latest revision. |
| <input checked="" type="checkbox"/> | f. Delineation showing which areas are to be irrigated.   |
| <input checked="" type="checkbox"/> | 4. Landscape maintenance specifications.  |
| <input checked="" type="checkbox"/> | 5. Planting details conforming with current horticultural practices.  |
| <input checked="" type="checkbox"/> | 6. Pedestrian and bicycle circulation systems, including width proposed and materials.  |
| <input checked="" type="checkbox"/> | 7. Outdoor pedestrian spaces with landscape architectural elements detailed.  |
| <input checked="" type="checkbox"/> | 8. Construction details for pedestrian and bicycle circulation systems, outdoor spaces, and site furnishings.                           |

### Health

| <i>Appl.<br/>Use<br/>Only</i> |   | <i>Twp<br/>Use<br/>Only</i> |
|-------------------------------|---|-----------------------------|
| <u>W</u>                      | 1. Location of all existing sewage disposal systems on-site and within 200 feet of the boundary of the entire tract.  | —                           |
| <u>W</u>                      | 2. Certification by a New Jersey Licensed Professional Engineer regarding adequacy of any and all existing on-site sewage disposal systems pursuant to Chapters 16 and 17. Potential reserve areas for modification of existing systems shall be shown on the plan. Application will be declared incomplete should failing or unsatisfactory conditions be noted, certified, or found to exist. | —                           |
| <u>W</u>                      | 3. Submission of laboratory test report for all existing on-site wells or potable water supplies pursuant to Chapter 16 and 17. Application shall be declared incomplete should failing or unsatisfactory conditions be noted or found to exist (Bacteria, Nitrate, Volatile organics, and other items required by the Health Officer).   | —                           |
| <u>W</u>                      | 4. Soils Tests shall be provided for primary and reserve septic areas pursuant to Chapters 16 and 17. Test results submitted which are invalid because of expiration dates or do not comply with all provisions of Chapters 16 and 17 shall render the application incomplete.  | —                           |

W 5. The Location and results of all complete, incomplete, unacceptable and unwitnessed profile pits, permeability tests, basin floods and percolation tests. All results shall be shown on a separate plan(s) entitled "Sewage Disposal and Water Supply Plan." All result locations shall be dimensioned to all proposed and existing lot lines, watercourses, easements, wetland limits, sewage disposal and water supply systems within 200 feet of the tests. —

W 6. Submission of individual soil test reports by soil log or test number for each test location in numerical ascending order shall be provided. Each report shall be signed and sealed by a New Jersey Licensed Professional Engineer and coordinated with each lot number shown on the plan submitted. —

W 7. Submission of well water supply evaluation pursuant to Chapter 16. —

W 8. The location of all on-site, off-site, and off tract test wells, monitor wells, and existing wells within 500 feet of the test wells are to be shown pursuant to Chapter 16. —

W 9. Written documentation signed by the homeowners, or affidavits executed by the applicant proving permission. All wells within 500 feet of the test well shall be monitored. In the event monitoring is not permitted, the denial by the homeowner shall be submitted. In the event of a denial or no response, an affidavit by the applicant detailing efforts made to obtain permission and/or the reasons for denial shall also accompany the application. —

W 10. Proof of submission of Treatment Works or NJPDES permit applications for any wastewater disposal method or system not in compliance with NJAC 7:9A., any system proposing to discharge more than 2,000 gallons per day, or any proposed connection to a public sewer system requiring a Treatment Works permit application. —

### Engineering

X 1. Designed, drawn, signed and sealed by A.I.A., C.L.A., N.J.P.E., N.J.P.L.S. or N.J.P.P. as appropriate. —

X 2. Blue or Blackline reproduction on standard sized sheets 30" x 42," 24" x 36," 15" x 21," 8½" x 13." —

X 3. Acceptable title block containing minimum data as prescribed by N.J.S.A. 13:40-1. —

X 4. All scales shall be written and graphically identified. Minimum scales for plan preparation shall be as follows:  
X a. Key Maps: 1" - 1000'  
X b. Boundary and Topographic Survey: 1" = 100'  
X c. Environmental Inventory Maps: 1" = 200'  
X d. Grading and Drainage Plans: 1" = 50'  
X e. Site Plans: 1" = 50'  
X f. Plans and Profiles: 1" = 50'-Horizontal; 1" = 5' - Vertical  
Horizontal to Vertical Ratio of scales being no more than 10. —

W g. Sewage Disposal and Water Supply Plan: 1" = 50' —

h. Landscaping: 1" = 50' for street tree planting islands. Individual unit, island, or other detailed landscaping being provided at a minimum of 1" = 30.'

5. A north arrow with reference meridian.

6. A legend identifying symbols and drafting techniques used.

7. A border shall be placed on all plans. This border shall be 1/2" for the bottom, right side and top of each plan with a 1½" border on the left side.

8. A boundary and topographic survey of the total tract signed and sealed by the preparing NJ. Professional Land Surveyor in accordance with N.J.S.A. 13:40. Topography shall be 5 foot intervals for slopes of 10% or greater, 2 foot intervals for slopes between 3% and 10% and 1 foot intervals for slopes up to and including 3%. Topography within 200 feet from the subdivision boundary shall be shown. All topography shall be based on NGVD 1988 datum. Benchmarks shall be established within 500 feet of the subdivision boundary and shown, together with appropriate references.

9. All existing and proposed utility service lines and laterals on site and along the frontage of the site. This shall include storm drainage, water mains, sanitary mains, sump pump connections, and underground electric and phone service.

10. Site Plan showing the proposed use and site improvements including but not limited to: existing topography; location of all proposed structures with dimensions to boundaries; location of all existing structures to remain or to be removed; proposed access aisles with curb-to-curb dimensions for width; curb radii dimensions; automobile parking stalls with dimensions for width and depth; truck loading and parking aisle and stalls with dimensions for stall length and width; type of truck to use loading area; typical truck radii detail; loading dock locations; all sidewalk locations and dimensions; provisions for handicapped; location of bench mark; flood hazard areas; wetlands boundaries; stream corridor areas; easement areas; traffic warning and regulatory signs; and trees to be removed/remain.

11. Drainage and grading plan duplicating all data shown on the site plan (dimensions not required to determine slopes should not be shown). Existing and proposed contours with intervals of one foot where slopes are less than two percent; with intervals of two feet where slopes are between two percent and ten percent; and with intervals of five feet where slopes exceed ten percent; spot elevations at bottom of curb for every point of curvature or tangency, breaks in grade, and handicapped ramps; elevations of drainage inlet grates and manhole rims; storm and sanitary sewer pipe invert elevations; elevations at corners of proposed structures; finished first floor elevations; and elevations at loading ramps. Contours must be based on NGVD 1988 elevations and benchmarks must be shown. Where drainage swales are proposed, the elevation, percent longitudinal slope and typical cross section of the swales shall be shown.

Proposed grading shall be designed to provide a balanced cut and fill condition as much as practical.

12. Storm drainage profiles for all diversion swales, waterways, storm sewer pipe and any other conduit shall be provided. These profiles may be shown on a separate sheet entitled "Drainage Profiles", the detention basin plan or construction detail plans. Existing elevations shall be shown at 100-foot intervals. Proposed elevations for appurtenances shall be shown at 100-foot intervals, concrete structure elevations shall be shown at 50-foot intervals; Invert elevations; elevations at grade changes. Proposed slopes shall be written.

13. A Stormwater Management Plan detailing all existing and proposed grades and contours, outlet structure details, conduit outlet protection details, all inverts of low flow channel with proposed longitudinal slope(s), typical cross section trash rack details, emergency spillway cross sections and profiles to point of discharge, construction details and designations of ultimate ownership of the basin.

14. Hydraulic calculations for stormwater detention showing no increase in runoff from the pre-development conditions for the water quality 2, 10, and 100 year storm frequency as determined by "Urban Hydrology for Small Watersheds TR-55" Type III rainfall using the following criteria.

a. Pre-development conditions shall be considered as "good."

b. Post development conditions shall be considered as "poor" with maximum impervious coverages permitted by ordinance being used in developing post development curve numbers.

c. Calculations shall include a separate drainage area map for both pre- and post-development conditions with soils types, soil uses and flow patterns, time of concentration flow paths and flow lengths and slopes being identified. A separate drainage area map for inlets shall also be provided.

d. Routing of pre- and post-development flows through each basin using the mass storage equation and "Urban Hydrology for Small Watersheds TR-55."

e. Emergency spillways shall be provided. The cross sections shall be designed to pass the 100-year post development inflow plus 50%. The invert shall be set at the crest of the 100-year storage elevation in the basin.

f. All detention basins shall be designed to serve as a sediment basin during and after construction in accordance with the Standards for Soil Erosion and Sediment Control in New Jersey References.

g. Computations showing Compliance with the Regulations of the D & R Canal Commission and the Mercer County Planning Board.

15. Hydraulic calculations for stormwater runoff collection systems shall be submitted. Calculations may use the rational method or Soil Conservation Service method pursuant to the Land Use and Development Ordinance.

16. Typical construction details shall be provided on drawings designated as "Construction Details." Details to be shown shall include: typical roadway cross section; storm sewer inlets and manholes (each type proposed); storm sewer headwalls, storm sewer trench; storm sewer flared-end section; underdrain; storm sewer step; curb; curb end treatment, depressed curb; sidewalk, handicapped ramp; street signs; warning and regulatory signs; mailbox, sump pump/underdrain to storm sewer connection; any "poured in place" concrete details and reinforcing schedules; and all retaining wall details. The typical details shown in the site improvement standards are preferred.

17. All on-site wetlands shall be field identified by a qualified expert in accordance with NJDEP standards, and surveyed, and located on the plan by the applicant's New Jersey Professional Land Surveyor. A wetlands report identifying all observations and findings of the wetlands expert shall accompany the site plan application. If the lands remaining are 50 acres or larger, and not to be built upon, wetlands will only be required to be identified within 150 feet of the proposed lots or any other on-site or off tract improvements. The applicant shall certify in writing that no construction shall occur upon the remaining lands until all on-site wetlands are identified.

18. Half cross sections, 50 feet on center, shall be provided for all roadways to be widened. Each section shall include the location and NGVD 1988 elevation of all existing and proposed physical centerline; right-of-way centerline; edge of pavements, right-of-way lines, sidewalk centerlines, sidewalk widths. In addition, the existing and proposed contours 25 feet from the proposed right-of-way line shall be shown.

Partial W

X 19. A traffic report and analysis including but not limited to existing and background peak hour traffic volumes and distribution patterns; peak hour onsite generated traffic volumes and distribution patterns; existing and proposed traffic composition; analysis of adequacy of proposed on-site circulation patterns including adequacy of truck and automobile turning radii; analysis of need for number of loading bays; existing and proposed levels of service and volume/capacity ratios; adequacy of proposed sight distances; analysis of need for acceleration/deceleration lanes; analysis of need for roadway striping, signage or reflectorization; need for signalization and a summary recommendation and conclusions for the analysis. The study area shall include the site as proposed by this application; the site as proposed by a master development plan; the existing and proposed roadway frontages of the site, and the nearest intersection of public roadways as measured away from the site in opposite directions. The roadways approaching the site shall be generally reviewed for adequacy to support site generated traffic. This report shall be prepared by a New Jersey licensed Professional Engineer qualified to make the analysis as required herein.       

X 20. Compliance with each and every design standard of the Land Use and Development Ordinance.       

W 21. Compliance with approved General Development Plan.       

X 22. Intermittent and perennial streams, lakes, and waterways with drainage areas 50 acres or larger and the 100-year flood hazard line of each.       

X 23. Stream corridor delineation with requisite buffers preserved by easement.       

### Planning

X 1. A key map sheet showing the tract in question: north arrow; zoning district limits; tax lot numbers, tax block numbers, tax sheet numbers; owners names as identified on certified list provided by Township for tract in question and all lots within 200 feet of total tract; Municipal Boundaries; Existing or proposed "Master Plan" features or facilities on the site or within 500 feet of total tract; Airport Hazard Areas; signature and seal of licensed professional; names and address of owner applicant and professional preparing the map; owners certification; zoning data for each zone with all proposed data and deficiencies listed, and index of sheets (where applicable). All measurements specified herein shall be measured radially from the boundary and shall include all lots, zones, etc. on opposite sides of roads and within other municipalities.       

X 2. Site Plan showing the proposed use and site improvements including but not limited to: existing topography; location of all proposed structures with dimensions to boundaries; location of all existing structures to remain or to be removed; proposed access aisles with curb-to-curb dimensions for width; curb radii dimensions; automobile parking stalls with dimensions for width and depth; truck loading and parking aisle and stalls with dimensions for stall length and width; type of truck to use loading area; typical truck radii detail; loading dock locations; all sidewalk locations and dimensions; provisions for handicapped; location of bench mark; flood hazard areas; wetlands boundaries; stream corridor areas; easement areas; traffic warning and regulatory signs; and trees to be removed/remain.       

X 3. Zoning requirements shall be tabulated to show all bulk requirements of the zone or zones in which the site plan is located and the bulk data proposed by the application. This tabulation shall also identify compliance or noncompliance for all existing structures. All lot areas shown shall be identified as gross and net areas in accordance with ordinance definitions. Density shall be shown as defined by the Land Use and Development Ordinance.

| Appl.<br>Use<br>Only                    | Twp<br>Use<br>Only   |
|---|--|
| <input checked="" type="checkbox"/> 4.  | Architectural floor plans for each floor and for each elevation. These plans shall be signed and sealed by a New Jersey Licensed Architect.                |
| <input checked="" type="checkbox"/> 5.  | Compliance with each and every design standard of the Land Use and Development Ordinance.  |
| <input checked="" type="checkbox"/> 6.  | Compliance with approved General Development Plan.   |
| <input checked="" type="checkbox"/> 7.  | Compliance with Historic Preservation Commission criteria for onsite structures or foundations and any sites or features within 200 feet of site boundary. |
| <input checked="" type="checkbox"/> 8.  | Identification and Location of Affordable Housing Units.   |
| <input checked="" type="checkbox"/> 9.  | Stream corridor delineation with requisite buffers preserved by easement.  |
| <input checked="" type="checkbox"/> 10. | Cultural features, historic sites, and critical view sheds, as mapped by the Township.   |

### Landscape and Lighting

- 1. Aerial extent of tree cover for woodland stand 10,000 sq. ft. or greater in area with a brief description of the typical tree species found within the stand, the average size of the trees measured 4-1/2' above grade, the average height of the woodland stand, and the general health of the woodland stand. This information may be combined with other environmental information and shown on the Environmental Resource Inventory Summary Map as part of the Environmental Assessment, instead. If this is done, provide a note referring to the Environmental Resource Inventory Summary Map on the Landscape and Lighting Plan.
- 2. The surveyed location of each individual tree 6" or > measured 4-1/2' above grade located inside the Limit of disturbance and extending 25' outside the limit of disturbance. A tree preservation chart showing the species and health of each individual tree located inside the limit of disturbance and extending 25' outside the limit of disturbance, and whether each tree is proposed to remain, to be removed, or to be transplanted.
- 3. Proposed trees, shrubs, groundcovers, and vegetative plants with key, detailing the following information:
    - a. Proposed plant names, both common and scientific.
    - b. Proposed plant sizes in caliper, height, and/or width at the time of installation.
    - c. Type of nursery stock, (i.e. balled and burlapped or container) and size planting.
    - d. Proposed plant spacing and any other comments relating to installation.
    - e. Planting notes, including a specification that the plants shall conform to the American Standard for Nursery Stock, latest revision.
    - f. Delineation showing which areas are to be irrigated.
  - 4. Landscape maintenance specifications.
  - 5. Planting details conforming with current horticultural practices.
  - 6. Pedestrian and bicycle circulation systems, including width proposed and materials.
  - 7. Outdoor pedestrian spaces with landscape architectural elements detailed.

|  |       |
|--|-------|
| <input checked="" type="checkbox"/> 8. Construction details for pedestrian and bicycle circulation systems, outdoor spaces, and site furnishings.  | _____ |

|-------------------------------|--|-----------------------------|

### Health

- w 1. Compliance with any and all conditions of preliminary site plan approval and the preliminary site plan checklist.
- w 2. Final septic system design criteria and grading shown on "Sewage Disposal and Water Supply Plan."
- w 3. Proof of submission of Treatment Works or NJPDES permit applications for any wastewater disposal method or system not in compliance with NJAC 7:9A., any system proposing to discharge more than 2,000 gallons per day, or any proposed connection to a public sewer system requiring a Treatment Works permit application.

### Engineering

- w 1. Compliance with any and all conditions of preliminary site plan approval and the preliminary site plan checklist. All documents submitted for preliminary site plan approval shall be appropriately revised, retitled, dated, and all documents submitted shall bear the same date.
- x 2. Architectural elevations - front, left side, right side, and rear signed and sealed by a New Jersey Licensed Architect. All plans to bear a common date of issue with final site plan.
- w 3. An estimate of all construction quantities for all on-site and off-tract improvements to public property or improvements which shall be dedicated to the public or planned to be maintained by a Homeowners Association.
- w 4. Metes and bounds descriptions for all right-of-way dedications, sight triangle easement; drainage; detention; or conservation easements; and common driveway easements.
- x 5. Detailed project phasing plan including proposed construction sequences, routes to and from site, construction methods, hours of operations, construction traffic control plans, temporary construction office locations, and any other construction-related plans.
- x 6. A Developer's Agreement approved and executed by the Hopewell Township Committee when improvements to public property or improvements which shall be dedicated to the public or a Homeowners Association are part of the approval.

This form is an integral part of any development checklist submitted to the Township of Hopewell wherein waivers from design standards or submission waivers from application checklist items are requested. This form must be completed for all requested waivers and submitted with the application in order for the application to be considered complete. It is the applicant's responsibility to complete this form in order for proper consideration to be given to the request. Adequate documentation and support data shall be provided with the request in order for the Township to determine the appropriateness of the request. Where technical references or support data are given, the request form shall be signed and sealed by the appropriate professional. Attach additional sheets as necessary.

## **ADDENDUM to Administrative Checklist Item 8**

### **CHECKLIST SUBMISSION AND DESIGN WAIVER REQUEST FORM –**

#### **I. Design Exceptions**

##### **A. Lighting**

###### Ordinance Section 17-90.1 – b.

Full cut-off requirement listed in 17-90.1 – b. requires 0% uplight. Selected luminaire emits ~5% of its total lumen output upward. The luminaire is under 50W and contains a refractive lens, both of which are encouraged by the ordinance for street lighting.

##### **B. RSIS De Minimus Exceptions**

Ordinance 5:21-4.19(b)2: Intersection Location: Opposite Existing or Offset More than 150 ft., required, 97 ft. provided. A De minimus exception is requested for the special condition of rear garages in all townhomes that are accessed via private rear alleys, primarily accessed by residents whose units the alleys serve.

Ordinance 5:21-4.19(b)5: Minimum Centerline Radius (Feet) Neighborhood – 100/Alley -100, required, Neighborhood-100/Alley- 50 provided. A De minimus Exception is requested for the special condition of special purpose private alleys serving rear loaded garages of all townhomes. The private alleys will experience lesser traffic volumes and speeds since they will be accessed only by the residents of the units those alleys serve.

#### **II. Submission Waivers**

##### **A. Preliminary Major Site Plan Checklist**

###### **Administrative**

10. Tree Survey, Preservation and Replacement: Applicant seeks a Submission Waiver from Ord. 12-4.9 “Tree Replacement Plan” to defer submission of its Tree Replacement Plan pending receipt of a) the Delaware and Raritan Canal Commission (DRCC) stream corridor mitigation planting requirements, and b) the NJDEP Riparian Zone and Wetland Buffer planting requirements. Pending receipt of such planting requirements, Applicant has provided existing tree conditions based on 100 ft by 100 ft representative tree plots (see, Existing Conditions Plans, Sheets 1 through 5 of 5).

# 16, 17, 18 and Health Items #1-10: Well and Septic: No wells or septic systems are proposed.

###### **Engineering**

8. and 18.: NGVD: A partial waiver is request in that a conversion has been supplied from NGVD 1929 to 1988.

21. General Development Plan: No General Development Plan is proposed.

### **Planning**

7. and 10: No Historic Preservation Criteria or cultural features are present on the site or within 200ft of the boundary.

### **Landscaping and Lighting**

2. Tree Survey, Preservation and Replacement: Applicant seeks a Submission Waiver from Ord. 12-4.9 "Tree Replacement Plan" to defer submission of its Tree Replacement Plan pending receipt of a) the Delaware and Raritan Canal Commission (DRCC) stream corridor mitigation planting requirements, and b) the NJDEP Riparian Zone and Wetland Buffer planting requirements. Pending receipt of such planting requirements, Applicant has provided existing tree conditions based on 100 ft by 100 ft representative tree plots (see, Existing Conditions Plans, Sheets 1 through 5 of 5.

### **B. Final Major Site Plan Checklist**

#### **Administrative**

12. Application seeks Combined Preliminary and Final Site Plan Approval. Request Conditions pertaining to Preliminary Approval be deferred to and incorporated into Final Approval.

14. Applicant requests that "will serve" documentation be made a condition of approval.

#### **Health**

1. Compliance with Conditions of Preliminary Approval: Application seeks Combined Preliminary and Final Site Plan Approval. Request Conditions pertaining to Preliminary Approval be deferred to and incorporated into Final Approval.

2. Final Septic Design: No septic proposed.

3. NJPDES Application: Not yet submitted, requires endorsement by Township.

#### **Engineering:**

1. Compliance with Conditions of Preliminary Approval: Application seeks Combined Preliminary and Final Site Plan Approval. Request Conditions pertaining to Preliminary Approval be deferred to and incorporated into Final Approval.

3. Estimate of Construction Quantities: item is requested to be deferred as a condition of Final approval

4. Metes and Bonds descriptions of Easements: Waiver requested as all easement will be recorded on the Filed Map.

9. Lot and Block Numbers: To be provided as conditions of Final Approval.

10. Copies of Federal State and Local approvals required as condition of Preliminary Approval: Request these be provided concurrent with Preliminary and Final Approval.

## **Planning**

1. Compliance with Conditions of Preliminary Approval: Application seeks Combined Preliminary and Final Site Plan Approval. Request Conditions pertaining to Preliminary Approval be deferred to and incorporated into Final Approval.
8. Copies of Federal State and Local approvals required as condition of Preliminary Approval: Request these be provided concurrent with Preliminary and Final Approval.

### **C. Preliminary Major Subdivision Checklist**

#### **Administrative**

10. Tree Survey Preservation and Replacement Plan: Applicant seeks a Submission Waiver from Ord. 12-4.9 "Tree Replacement Plan" to defer submission of its Tree Replacement Plan pending receipt of a) the Delaware and Raritan Canal Commission (DRCC) stream corridor mitigation planting requirements, and b) the NJDEP Riparian Zone and Wetland Buffer planting requirements. Pending receipt of such planting requirements, Applicant has provided existing tree conditions based on 100 ft by 100 ft representative tree plots (see, Existing Conditions Plans, Sheets 1 through 5 of 5).

- 16., 17., 18. Well and Septic: No wells or septic systems are proposed.

#### **Engineering**

- 8., 11., and 18.: Partial Waiver: A partial waiver is request in that a conversion has been supplied from NGVD 1929 to 1988.

23. General Development Plan: No General Development Plan is proposed.

## **Planning**

4. General Development Plan: No General Development Plan is proposed.
6. & 7.: No Historic Preservation Criteria or cultural features are present on the site or within 200ft of the boundary.

## **Landscaping & Lighting**

2. Tree Survey Preservation and Replacement Plan: Applicant seeks a Submission Waiver from Ord. 12-4.9 "Tree Replacement Plan" to defer submission of its Tree Replacement Plan pending receipt of a) the Delaware and Raritan Canal Commission (DRCC) stream corridor mitigation planting requirements, and b) the NJDEP Riparian Zone and Wetland Buffer planting requirements. Pending receipt of such planting requirements, Applicant has provided existing tree conditions based on 100 ft by 100 ft representative tree plots (see, Existing Conditions Plans, Sheets 1 through 5 of 5).

#### **D. Final Major Subdivision Checklist**

##### **Administrative**

11. and 12. Signed Preliminary Plans/ Compliance with Conditions of Preliminary Approval: Compliance with Conditions of Preliminary Approval: Application seeks Combined Preliminary and Final Site Plan Approval. Request Conditions pertaining to Preliminary Approval be deferred to and incorporated into Final Approval.

13. Postal addresses: Street names to be supplied and coordinated with Postmaster

##### **Health**

1.Compliance with Conditions of Preliminary Approval: Application seeks Combined Preliminary and Final Site Plan Approval. Request Conditions pertaining to Preliminary Approval be deferred to and incorporated into Final Approval.

2. Final Septic: No wells or septic systems are proposed.

3.NJPDES Application: Not yet submitted, requires endorsement by Township.

##### **Engineering**

1. Compliance with Conditions of Preliminary Approval: Compliance with Conditions of Preliminary Approval: Application seeks Combined Preliminary and Final Site Plan Approval. Request Conditions pertaining to Preliminary Approval be deferred to and incorporated into Final Approval.

3. Estimates of Construction Quantities: Item is requested to be deferred as a condition or Final approval

4. Waiver requested as all easement will be recorded on the Filed Map.

10. Lot and Block Numbers: To be provided as conditions of Final Approval.

11. Copies of Federal State and Local approvals required as condition of Preliminary Approval: Request these be provided concurrent with Preliminary and Final Approval.

##### **Planning**

1.Compliance with Conditions of Preliminary Approval: Application seeks Combined Preliminary and Final Site Plan Approval. Request Conditions pertaining to Preliminary Approval be deferred to and incorporated into Final Approval.

5. Lot and Block Numbers: To be provided as conditions of Final Approval.

6. Copies of Federal State and Local approvals required as condition of Preliminary Approval: Request these be provided concurrent with Preliminary and Final Approval.
